W. J. ...

Sir,—

I enclose the account for the fence at Rocky Point. I found it necessary to have a gate placed at the entrance to the reserve from the main road. There was no fence before and that may have been one of the reasons why the fence was torn down. There was no way for a horse and waggon or a car to enter the reserve. It is necessary to have such an entrance as the ambulance even has to make an occasional trip there to take a patient to the hospital. The gate does not enter from the side of the Summer Resorts but from the road, and there can be no objection to it. I did not have time to call for tenders for the material required for the fence but dealt with L.M. Poole & Co who furnished material previously. I had very little time to attend to the matter for I spent one whole day in Charlottetown before I could get across as the ice was packed in the harbour. Then the next day I got across in the morning and the ice backed into the harbour and I could not get back to the city till it was late in the evening and the places of business were about to close. The delay caused by the ice also explains why the expenses of the trip was larger than I anticipated.

John A. Donald
