

Fir kind, and watered by small Rivers; it affords good Anchorage in many Parts of it, particularly on the West-side which is the best Place, as being the clearest of Danger, and most convenient for Wood and Water.

Between *St. Margaret's Bay* and *Point Ferolle*, is a small Bay called *New Ferolle*. *Ferolle*, which lies in S. S. W. about 1 Mile, and is quite flat all over, having not quite 3 Fathom in any Part of it, and in some Places not more than 2, and open to the N. E. Winds; there is a Stage on each Side of the Bay, and Room for as many more.

Point Ferolle is situated in Latitude $51^{\circ} 02'$ North, is 2 Miles in Length, *Point Ferolle*, of a moderate Height, and join to the Main by a low Neck of Land, which divides *New Ferolle Bay* from the Bay of *St. John's*, which makes it appear like an Island at a Distance; all the North-side of the Point is very bold too, having 20 Fathom Water very near it; but from the S. W. Part stretches out a Ledge of Rocks into the Bay of *St. John's*.

This Part of the Coast may be easily known by a long Table-Mountain, in the Country above the Bay of *St. John's* the West-end of this Mountain, from the Middle of the *Point Ferolle* bears S. by E. and the East-end S. $59^{\circ} 30'$ E.

In turning between *Green-Island* and *Point Ferolle*, you ought not to stand nearer the Shore (until you are to the Westward of *Flower Ledge*) than half a League, unless well acquainted; you will have for the most Part at that Distance off 20 and 24 Fathom Water; after you are above the Ledges, that is, to the Westward of them, the Shore is much bolder, but the Soundings not quite so regular; you will have in some Places 15 and 16 Fathom Water close to the Shore, and in others not above that Depth 2 Miles off; the Land between *Green-Island* and *St. Barbe*, next the Sea, is very low and in some Places woody. The Land between the Bay of *St. Barbe* and *Point Ferolle*, is higher and hilly, the most Part covered with Wood, and watered with Numbers of Ponds and small Rivers.

In the Harbour of *Griguet*, *Quirpon*, and *Nody Harbour*, it flows Full and Of the Tides. Change about E. by N. in the Bay of *Pistatet*, and Places adjacent E. by S.

In all which Places it flows up and down, or upon a Perpendicular; Spring-Tides 5 Feet, and Nip-Tides 3 Feet.

At *Green-Island* S. E. Bay *St. Barbe*, and Bay *St. Genevieve* S. S. E. Old and *New Ferolle* about S. by E.

In all which Places it flows up and down, or upon a Perpendicular; Spring-Tides 7 Feet, and Nip-Tides 4 Feet.

Before *Quirpon* in settled Weather, the Tide or Current sets to the Southward nine Hours out of twelve, and stronger than the other Stream; in the *Straights* the Flood in the Offing sets to the Westward two Hours after it is high Water by the Shore, but this Stream is subject to Alterations in blowing Weather.

On the Coast of *Labradore*, a little way in-land from *Labradore Harbour*, Our Ladies or Bay *Phillipeaux*, is a very remarkable Mountain, forming at the Top three Bubbies. round Hills called our *Ladies Bubbies*. This Mountain bears from the Bay of *St. Barbe* N. W. a quarter N. from the Bay of *St. Genevieve* N. 30° W. and from *Deg-Island* N. $14^{\circ} 45'$ West.

Bell Isle which lies at the Entrance of the *Straights*, to which it gives Name, is about 7 Leagues in circuit and pretty high; on the N. W. Side of it is a Bell-Isle. very small Harbour fit for small Craft, called *Lark-Harbour* within a little Island
