

## The Milk Supply Open to Suspicion

Tuberculosis in cows is very prevalent. The preparation of infant foods with infected milk is dangerous.

### NESTLÉ'S FOOD

meets this emergency, being prepared for use with **water only**. It furnishes the safest and most nourishing diet for infants obtainable. Also the most valuable Food during the

### HOT WEATHER

as it has proved itself after over a quarter of a century's use the best **Preventative of Cholera Infantum**.

Sample and Pamphlet on application to **Thos. Leeming & Co., Montreal.**

The most Convenient and Economical Method of Producing Local Anæsthesia.

**ETHYL CHLORIDE BENGUE** is an anæsthetic, which is at once rapid in action, convenient to use, always reliable, harmless and inexpensive.

Put up in Glass Bulbs containing 37 to 40cc., and terminating in a short tube with a capillary orifice, upon which is fixed a copper screw-thread. On the screw is a cap, also of copper, which, being lined with India-rubber, closes it so tightly that the Chloride is prevented from evaporating, and can be used in the exact quantity required by the case in hand. It is thus extremely economical, as each bulb of **ETHYL CHLORIDE BENGUE** contains sufficient for 10 to 15 local anæsthesias. Supplied with Straight Stem or Curved Stem (as illustration).

The use of **ETHYL CHLORIDE** is without danger of any kind, and it can be applied equally to skin and mucous membrane.

**Remember to Specify ETHYL CHLORIDE BENGUE.**

Pamphlet and full particulars on application to **THOS. LEEMING & CO.**
