WAR DEATH CLAIMS OF GERMAN COMPANY

Concordia of Cologne had 255 Killed to February Last Insured for Total of \$389,709

MANY OFFICERS INCLUDED

Carried Insurance of \$159,430—Average Period of In surance up to War Was Only 4.7 Years.

Ir view of the recently completed war insurance placed on Canadian soldiers at the front, the first claims on which have just been placed, the experi ence of German companies is of more than usual in books of this sort in the last and had been received for bonds covering contracts of the management of the Kaiser in America, when he ence of German companies is of more than usual interest business. During that period applications and here received for bonds covering contracts press bureau organization for Scandinavian countries. Cologne, giving details of the company's war death losers to the end of February last, has been obtained through the United States. The statement follows: At the end of 1913 the Concordia had insurances ipon the lives of 8,968 men, for an aggregate amount of capital insurance of \$12,727,500. To these must be added 1848 men who had taken out insurances against war risk, to the amount of \$3,305,000, bringing the total insurances on 10.816 men to \$16.032,500. Of these $255\ \mathrm{had}$ lost their lives up to the end of

February, 1915. These held insurances of \$389,705. The first war death loss reported was that of a eldier who succumbed to his wounds on August 19, 1914, and was for \$1,250. The death notice was received on August 25, 1914. The second loss was newspapers regarding the propriety of a Baronetcy that of a man killed on August 21, and who was car-

SAVING IN COMPENSATION COST EFFECTED BY BOARD

New York, June 4.- The establishment of the Compensation Inspection Rating Board has resulted in a very material saving in the cost of compensasurance to the employers of the state, as ma be judged by the following table of figures, as esti-mated by the Insurance Department for the first nine months of the operation of the Board. Net premium decrease on risks subject only

inspection credits without figuring is the credits allowed for experience \$ Net premium decrease on risk subject to credits for both inspection and experience Net premium decrease on risk subject to credits on experience only

Total net premium decrease
Adding 20 per cent. for underestimated payrolls Total estimated decrease for the first nine

months 1,045,753 Being at a rate for the year of 1,394,337 This reduction in cost of compensation insurance to employers of the State does not only represent cuts in manual rates by reason of the application of the analytic schedule through inspection of risks by reason of reclassification of the separate risks onstituting one industrial risk, but also is to considerable extent due to the installation in the plants of the employers which are entitled to credits in the rate schedule. The employers have by these safety appliances not only saved money on their rates, but have materially lessened the hazards to which their employes are exposed.

MUTUAL TAKES PRECAUTIONS AGAINST THE RISKS OF WAR.

The following rider or statement supplemented to

application for insurance has been adopted by the Mutual Life Insurance Company of New York: I am a citizen or subject of

 I am not a member of any military or naval or ganization in any capacity and am not subject to nilitary, naval or reserve duty in any country ex-

cept as follows: 3. I have no intention of enlisting in any military naval organization of any country or of engaging in work as a civilian in any capacity whatsoever in onnection with actual warfare except as follows: . .

4. 1 do not contemplate travelling in foreign co ries except as follows: the countries to be visited and the routes to be taken) 5. I agree that any policy the company may issue apon this application shall contain the following clause instead of the clause agreed to in question No. 8 of the application for the policy:

This policy during the first two years of its eviet ence does not insure against death due directly or indirectly to a state of warfare or to insurrection; in case of death so resulting, the policy shall be null and void, and the company shall not be liable for any payment thereunder except for the return of the amount paid as premium.

FOREST FIRE RAGING BUT GENERAL OUTLOOK HOPEFUL

mer Season Comparatively Free From Seri Outbreaks is Expected—Rain Has Beon Plentiful and Green Undergrowth Well Developed.

Port Arthur, Ont., June 4 .- Forest fires in the vicinity of Port Arthur have robbed thirty farmers of their homesteads, entailing a loss of thousands of dollars. Small fires have been reported recently, but on Wednesday they developed into serious dimensions. No help is available, as every fire ranger is working day and night and the farmers have been notified to save their homesteads in the best manner they can. At Goreham Township ten farmers have been completely burned out and unless rain comes soon the flames threaten to devour several other neighboring farms.

Regarding the outlook for a summer seas paratively free from serious forest fires, the Canadian Forestry Journal says the prospect is decidedly hope-ful. Reports secured from officials in control of large areas in Ontario, Quebec and the Maritime Provinces state that rain has been falling in abundance, and that the green undergrowth is developing to a marked degreee. These facts stand out in striking contrast to the 1914 forest conditions when during April and May severe drought had made itself felt, unbroken by more than occasional showers, and the

forest floor was parched and ready for ignition.

Reports show a very hopeful condition in regard to the probability of dangerous fires this year. The rains have been heavy and the ground is moist and covered with fresh vegetation-distinctly better than a year ago. A Nova Scotia correspondent reports heavy rains and a very good prospect in regard to fire immunity. Many of the Quebec lumber compan es sent their rangers into the woods a week or two earlier this year, and the extinction of several incipient fires in valuable parts of the limits towards the end of April well repaid the precaution.

Throughout the Western Provinces the spring came early and with high winds in many places. Fires started earlier than usual and for a time during the month of April the condition looked serious. Fires were reported from British Columbia and also in the orthern parts of Alberta and Saskatchewan, and It looked as if the season was likely to result in heavy loss. Fortunately during May rain has fallen generally and the situation is now under control so that the spring danger having passed, the prospects for the ason seem favorable.

MAKE 1,000,000 RIFLES.

Springfield, Mass., June 4.—The New England Westinghouse Company has purchased two mechanical concerns at Chicopee Falls and will utilize them for the manufacture of war munitions, the first order being for 1,000,000 military rifles for the Russian
