

The "F" Power and Light Plant lightens work—brightens the home

Your home and farm buildings brilliantly lighted the moment you press a button. Your time and labor saved morning, noon and night. Your wife relieved of work and worry every day of the year. Your farm increased in value and earning power because you can undertake and accomplish more.

No matter where you live or what kind of farming you do, you will find in the utility of this plant the greatest source of comfort and satisfaction on your farm. The "F" Power and Light Plant is constructed as a separate unit plant, so that the full power of the 1½ h.p. "Z" engine can be utilized to run the separator, churn, grindstone, pump, washing machine, and any other light machinery.

Direct belt drive not only saves the 50% power waste caused by driving machines by small electric motors, but also makes it unnecessary for you to buy individual motors.

This plant runs six hours on one gallon of fuel—kerosene or gasoline, send coupon to our nearest office for catalogue, which gives full particulars.
