LONDON, ONTARIO, JANUARY 6, 1910.

No. 902

Frame goes all the way round

Sows accurately in dirty fields.
Runs easily. Dust-proof hubs.

You need never fear that the "Champion" Disc Drill will prove a "quitter." Like all machines in the Frost & Wood "Quality" Line it is built to work where others quit. The "Champion" will sow seed in "dirty" fields where corn roots, tangled grasses and straw manure are in such profusion that an ordinary Disc Drill soon gets choked up and cries "enough." The "Champion's" carefully tempered,

sharp-edged steel discs seem to revel in such a field. They make a clean cut right through such rubbish. They gather no trash. The cutlery-steel scrapers keep them scrupulously clean.

Should a heavy stick or stone be in the path of the machine, don't stop and waste time throwing it out of the way. Just keep right on. The discs are adjusted to raise automatically and roll over the obstruction.

Ball Bearings in Disc Hub

Disc, Boot And Scraper

Frost & Wood

Champion Disc Drill

Your horses would rather be hitched to the "Champion" than an ordinary Disc Drill, because the "Champion" runs so much easier. It has friction-eliminating Ball Bearings in the disc hubs, where others have hard-running friction bearings. As there are eleven to twenty discs on each machine you can imagine how much lighter-draft the "Champion" must be.

These Ball Bearings on the "Champion" are in dust-proof hubs, too. You need oil them but once a year, whereas friction bearings are crying for oil and getting choked with dust all the time.

Yes, indeed, you can sow a lot more seed in the same time with the "Champion" than with harder-running disc drills.

Before you get your machine we know positively that the "Champion" will do your sowing accurately. We set up complete both the Grain and Grass Seed Boxes and test them thoroughly before they leave the factory. We make sure that every part of this machine—and every other machine bearing the Frost & Wood name—will do its work perfectly from the minute you begin to use it.

You can sow as you please with the "Champion." There are no "slot holes" or notches into which you must shove a shifting lever. You can adjust the Index so your machine will sow to a fraction of a pint if you so desire. And the Grass Seed Index is plainly marked for different varieties of grass seed. You'll not find this convenience on other makes of disc drills.

"Champion" Disc Drills have Telescope Axles, while other Drills have to have loose axles to accommodate their range of pressure. They cannot compare in rigidity with the "Champion." We maintain a perfectly stationary axle and grain box.

We've not the space to tell you other points of superiority about the "Champion," so send today for our Disc and Hoe Drill Catalog F 43, which describes our line in detail. And remember this: No manufacturers maintain a higher standard of Quality than Frost & Wood, and no maker gives you more downright value for your money. You are making a sound investment when you purchase a machine of Frost & Wood Quality.
