

Fresh from the Press!

HERE is a New Book, all about roofing. It tells WHY the roof is the most important part of any barn or building—HOW to protect your barns and dwellings against fire, wind, rain and lightning, and—WHERE the right roofing is sold in your district. It gives full instructions for laying the "Right" Roofing—tells how to build a barn (illustrating the different stages in the construction with reproductions from actual photographs) and contains valuable hints on ventilation. The name of this book is

The RIGHT Roof

You need it NOW. A copy will be mailed, prepaid, to your address upon request. This illustration shows pages 6 and 7. Here are shown the "Oshawa" and the "George" galvanized steel shingles, which lock securely on all four sides, making a roof that is practically one continuous sheet of steel—Fireproof—Rain-proof—Wind-proof—Lightning-proof.

Each "Oshawa" Shingle has a covering capacity of 16 x 20 inches, taking 45 shingles to the square of 100 feet (10' x 10'). The big "George" Shingle is 24" x 24" in size, and 25 of these big shingles will cover 100 square feet of surface.

No special tools are required to lay the RIGHT Roof. Anyone who can use a hammer and snips can do the work easily and quickly.
