Sullivan "DR-6" Hammer Drills For Fast Tunneling and Drifting

The "DR-6" is a light weight, heavy duty, fast drilling, mounted hammer drill, for tunneling, drifting and general mining work.

The "DR-6" has a 2½-in. cylinder, weighs 148 lbs. and handles 1¼-in. hollow steel on holes up to 12 ft. or more.

Among the "DR-6" features that mean convenience, rapidity and economy for you are:

1. Combined air and water jet, keeping down "bug-dust" at the source, and permitting maximum cutting speed by instant removal of sludge.
2. Single throttle for air and water control.
3. Front end, piston bar rotation, no separate rifle bar.
4. Hand-adjusted lock ring for gripping and releasing the lugged steel in the chuck.
5. No outside valve chest to hinder steel changes. Axial shell valve with end seats.

"DR-6" Drills have "made good" under all sorts of conditions and against severe competition. Performance records on request.
