Money to Move the Crops

(National Crop Improvement Service.)

"Every year we see in financial news that the bankers are conserving money to move the crops.

"How does the farmer get his money? He has been carrying all of the risk and the sum total of this risk by all the farmers makes the risk carried by speculators fade into insignificance," says Mr. R. S. Rider, president, Canadian Steel & Wire Co.

"The farmer has always resented a fixed price because he considers that his wheat may be worth more than that at any time when he wants the full value for his property, but really the fixed price has very little to do with the selling price because at no time during the war period did wheat sell below the guarantee.

"Farmers have always said that if the middleman could be eliminated that they could get more for the wheat and the public could buy it for less.

"The Wheat Growers Association has demonstrated its ability to market its wheat co-operatively and it has not been difficult to finance every wheat transaction when placed upon a business basis."

Double-ended Wrench.

Double-ended wrenches are popular, especially among autoists, for their sturdy simplicity, as compared with the awkwardness of the ordinary monkey wrench, says Popular Mechanics Magazine. Even the latter's advantage of adjustability now has been conferred upon the former, for a two-ended wrench that handles ten sizes of nuts has been placed in the market. One jaw at each end is slidably mounted, with a pin moving in a slot, and locks in place against a ratchet edge. The body, which is seven and three-fourths inches long and three-eighths inch thick, has positions for the various sizes, from one-fourth to seven-eighths inch, marked upon it.
