The Influence of Money!

When funds are scarce interest rates rise and investors loan their funds on mortgages and bonds for the high return, but when money is plentiful interest rates naturally decline and surplus funds are put into good stocks causing them to advance in price. The latter condition exists in America. That country has accumulated the lion's share of the world's goods, and this surplus money is seeking higher earning power than bond interest offers. We suggest buying good stocks now for advancing prices.
