ROWELL ISSUES A MANIFESTO TO THE **VOTERS IN ONTARIO**

Liberal Leader Makes Plain the Issues of the Campaign.

ELECTION IS HELD

Conservative Government Endeavoring to Forestall the Inevitable.

[Special to The Advertiser.] TORONTO, June 8 .- N. W. Rowell leader of the Liberal party in the Province of Ontario, issued the following manifesto tonight:

"To the Electors of Ontario: "The Legislature has been prematurely dissolved, and the province has been put to the trouble and expense of a general election, not to serve any public interest, but to promote the political fortunes of the present administration. The signs of dissension and disintegration are everywhere manifest, and the Government prefers to take its chances now rather than a year and a half hence, when the public would understand the situation The important measures referred to by the Prime Minister in his manifesto are not controversial issues in the present contest.

Workmen's Compensation.

operation—passed largely through the inevitably follows these conditions. pressure brought to bear upon the Government by the Liberal members of the Legislature and the labor interests of the province.

"The only question before the electors in reference to workmen's compensation 's whether this act shall be put into operation by the men who believe in workmen's compensation law. for prompt medical attenuance to an injured persons, commonly called "first aid," cities continue to solve, the situation and deal patriots and Christians.

"The good roads movement was in-

"We are glad to note the Government is moving in the same direction The only question is, shall this advanced movement be planned and carried out by the men who have been for year's advertising it, or by the Government which has been all too

Hydro-Radial Proposition. "The hydro-radial proposals were

first introduced into the Legislature by the Liberal opposition, who have take action. Hon. Adam Beck has always been a strong and enthusiastic advocate of hydro radials; but that he had great difficulty in persuading his colleagues to move is known to every-body. We welcomed the Government's proposals, though tardily brought down. We supported the Hon. Adam Beck's bill in the Legislature, and we pledge ourselves to promote the development of hydro-radials throughout the province.

New Ontario.

"In New Ontario we have a territory larger by half than either of the provinces of Saskatchewan or Alberta, and rich in natural resources. Its development and settlement constitutes one of our greatest opportunities and greatest responsibilities. Its settlement would bind together the East and the West, providing new markets for the manufacturers and businessmen of our cities and towns, and increased employment for our workingmen and the food supply for the consumers of the While we are importing food pro-

ducts, we have millions of acres yet untilled. We have spent and are spending millions of dollars on railways and new roads to open up the country. The only way we can maintain these great public works and get a return on our investments, the interest of which now constitutes a serisettling the country. As it is, the Department of Colonization, under the Minister of Agriculture, has failed to grasp the importance or urgency of the problem. We propose to enter upon this policy of development and settlement as a business and patriotic enterprise. enterprise, put the Department of Colonization under a minister who will enterprise, put the Department of Colonization under a minister who will devote the necessary time and ability to this great task, and if the creation of a new department should prove necessary, we will not hesitate to do it. necessary, we will not hesitate to do it.
"We disapprove of and protest
against the alienation by the present
Government of \$3,000,000 acres of our finest land by way of land grants to railways, and we propose to put a stop to this policy, and to conserve our resources for the people, our lands

"We protest against the financial waste of the present Government, of which Government House serves but an illustration, while the Government last year cut down the grants to rural public schools 28 per cent.
"The Department of Agriculture and Education are the most important departments conducted by the present Government. In a province unsurpassed in natural advantages for mixed farming, and with a consuming population demanding more than we are producing, we are faced with a steady decline in our rural population, and diminution in our food production. With the decline in rural population has come a decline in the strength and vitality of the rural school and the rural church in many sections of the province. The whole question of rural life presents a problem of great magnitude and importance, of which the present Government does not appear

Financial Waste.

to be cognizant, but which we must face and help if we are to preserve our national strength and vitality.

Most Urgent Need. "Our most urgent need at the pres-ent time is a Minister of Agriculture possessing the qualities of leadership, with a thorough understanding of the agricultural situation and the courage and capacity to co-operate with the agricultural interests of the province in progressive movements and improve exceeding conditions. We promise, if

ilassana se e

returned to power, to put at the head of the department the best man to be found in the Province of Ontario, whether elected at this general elec-

tion or not.
"The Department of Education, under the present Government, has lost the confidence of the people. A Conservative newspaper has pointed out that the minister has his eyes on the ballot box, rather than on the schools of the province. If our educational problems are to be solved, if our educational progress is not to be further retarded, we must have a Minister of Education with modern educational ideals and with capacity and sympathy to work out the grave ed-ucational problems of this province. Our greatest difficulty arises, not so much from our laws as from the regulations of the department and the manner in which the minister administers them.

"We promise, if returned to power to put at the head of this department the best qualified man to be found in "While our rural population has

been steadily declining in the older counties of the province, our urban population has been continuously and rapidly increasing.

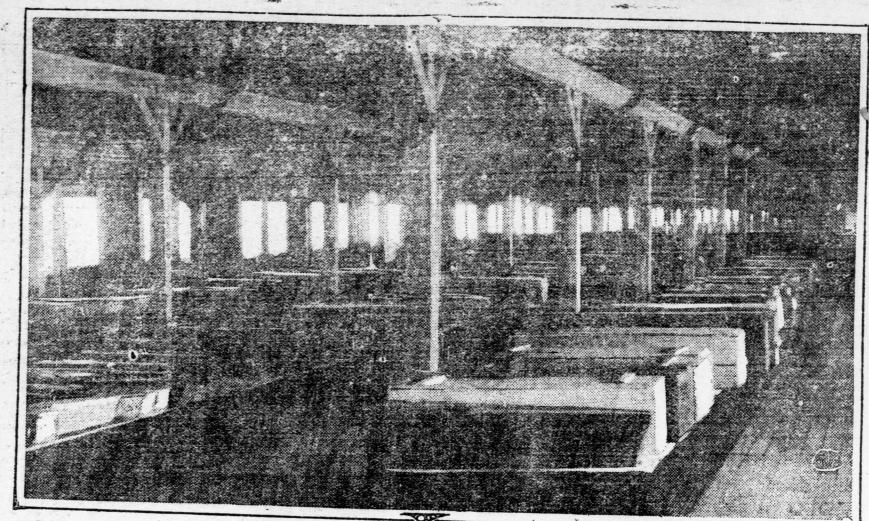

Problems To Be Faced.

"With the growth of our cities, we are compelled to face problems of the modern city in all industrial communities, viz., the rich growing richer, and the poor, poorer, a rapid rise in real estate values, making it exceedingly difficult for the workman to own his own home, and imposing great additional burden upon the businessman; the inflation on real estate values, and tax upon the labor and industry of the future, which will weigh most heavily on those least least able to bear it; insufficient and insanitary housing accommodations, congested areas, slum conditions, thousands of women and girls, who are to be the mothers of the next generations, employed in shops and factories, many of them under unsatisfactory conditions of employment, both as to hours of labor and wages and sickness and old age, without the resources to meet the latter; the "The workmen's compensation act, the open bar, which tends to thwart olighting and destructive influences of after a year of delay, has at last been every effort at improvement, and the passed, though not yet brought into social and moral degeneration which Policy of Drift.

Live in Lovely Lambeth

There's a lot in knowing "which way the cat is going to jump." If people in great cities like Chicago, New York and others had known which way the growth of the city would trend, many of them would be millionaires today. In many a city, districts that only a short time ago were considered beyond reach of the city's growth are now the choicest suburbs.

Lambeth is but 18 minutes' ride from the heart of London—the fare only 7 cents a trip, which will be further reduced as soon as population warrants. Many of London's businessmen are residents of Lambeth right now.

First-comers in a movement of this kind always make the most money. Today starts the sale of a limited number of lots in

All lots front on Broadway Avenue, the fine wide thoroughfare which runs down the centre of the property. Lambeth New Survey will be a district of quiet streets, away from the smoke and dust, the heat and noise of the city. Here a man will enjoy real relaxation from the toil and cares of business life, and his family will benefit from the health-giving ezene, uncontaminated by factory smoke and odors.

Most lots measure 50 feet wide by 135 feet deeg-ample room for gardening and chicken raising. Lambeth has excellent water, easy to get. This property has splendid drainage and commands a magnificent view on every hand. That on line runs parallel with the property and only 100 yards away. The tax rate has been fixed at the very low figure of 10 mills. Hydro will be available by October without fail, according to the statement of Hon. Adam

Lambeth right now is going ahead rapidly, and wherever one turns, but one constitions may be seen in active progress. Plan for a home of your own. Even if you do not intend to halld new, you will convisely to our carly and get a chaire site, because lots in Lambeth New Survey will inevitably advance in price. The limited number to be soig means that late-comers wishing to tuy will have to purchase from someone
