DOUBT REMOVED

Messages Exchanged Between Inspector Dew and Capta Montrose Make Forn Since of His Quarry

OFFICER'S ARRIVAL AT FATHER POH

Fugitives Kept in Ignorance Coming Arrest and Preca tions Taken Against tempts at Suicide.

FATHER FOINT, Que., July 29.—
spector Dew of Scotland Yard arriv
here this afternoon on the Lauren
and disembarked to await the arrival
Sunday afternoon of the S. S. Montro
with the man, Dr. Crippen, whom he I

with the man, Dr. Crippen, whom he crossed the ocean to arrest for the m der of his wife.

Of the identity of the suspect the is no longer any doubt. The Laurer was in wireless communication with Montrose for some time, and messa which passed between Inspector I and Captain Kendall of the Montromylined, the inspector that he had convinced the inspector that he had quarry in his grasp. Crippen is complete ignorance that his identity suspected, and he will be a greatly s prised man when on Sunday afternot the pilot boards the Montrose, accopanied by Inspector Dew and a smarmy of newspaper men from all over the country, who have gathered here witness the most spectacular arrever made, and one that would have not made and the spectacular arrever made, and one that would have not made and the spectacular arrever made, and one that would have not most telegraphy.

When the Laurentic hove in sight to government boat Eureka went out meet her, carrying the pilot and all newspapermen, as well as chief McC thy of the provincial police force, the steamer slowed down a port wopened and from a ladder which we dropped down came a thick-set man, later the steamer and the ste convinced the inspector that he had

lropped down came a thick-set man. spector Dew. No sooner had he tou "You are worse than they are on other side," he remarked. He was in a specially communicative mood, by told his interviewers to see him on Su day. After advising Scotland Yard his arrival, he went for a drive with the McCarthy, whose guest he will while in Father Point. while in Father Point.

Precautions are being taken on the Montrose to see that Dr. Crippen do not make away with himself. He under the special care of a couple stewards, who keep him in sight much as they can without letting he suspect that he is in sight of arrest the Montrose, it is expected, will a rive off Fame Point tomorrow afte noon, and reach Father Point some time on Sunday morning. In the meanting the suspect of the suspect of the work of the suspect of th

NEW MASTER JOINS SHIP HOLT HIL

Capt. Bray, Formerly of the Earl Dunmore Comes to Take Place of Late Capt. Bolderstone

VANCOUVER, July 29.—Capt. Bra who is to take command of the Britis bark Holt Hill, of which the late Cap. A. E. Bolderstone was master, arrive yesterday from Europe and assume his new duties immediately after a state. riving. Capt. Bray is not unknown the Sound. He was first mate of the British bark Earl of Dunmore whe that vessel loaded grain at Tacon several years ago. The Holt Hill he completed her cargo, and will lear for Callao as soon as she has take the required crew. She is expected sail next week.

The Russian ship Mariechen, which

shifted here from Fraser river, is con pleting her cargo, and will probab tow to sea about the same time as the Holt Hill. The Marichen's cargo for South Africa.

The barkentine Georgia, lying a Port Townsend, has been chartered the same time as the same time as the same time.

load lumber at Vancouver for West Coast . She has been lying i at Port Townsend since her arrival the Sound from Mollendo April 28.

TO EARTH'S CENTRE

Novel Experiments Being Carried Ou by German Experts. BERLIN, July 29.—Experiments hav been made in Germany with the object of ascertaining whether communication can be established by means of wirelest elegraphy between the surface of the earth and its interior. Two German physicists, Dr. Lowy and Dr. Leimbash, have, with the permission of the royal mining authorities, made a serie of trials at the Dienenburg Potas Mines, and, according to the "Tage of trials at the Dienenburg Potas Mines, and, according to the "Tage blatt," they have succeeded with quit simple instruments in exchanging wire less signals at long distances an through several levels. The signal were so strong that the scientists ar convinced that they will penetrate the greater depths through the crus of the earth than they did on this occasion.

Colonel Denison Honored. LONDON, July 29.—Colonel G. 7 Denison, of Toronto, has been electe-vice president of the Royal Colonia

Canadians Win.

Canadians Win.

LONDON, July 29.—The Canadia Zingards won a close game at Folke stone by eight runs. Folkestone is their first innings had 162 runs and the Zingarls in the second innings had 16 runs. William Marshall made 48; Wall desman Marshall 22, and Green 20 Folkestone had 218 runs in the second innings. Lownsborough took fou wickets for 21 runs; Wright two wickets for 34 runs. The Canadian field ling way splendid, Seagram making time catch.
