

ing the persistent headache which accompanies nervous asthenia. In neurasthenia, in mild hysteroid affections, in the various neuralgias, particularly ovarian, and in the nervous tremor so often seen in the confirmed drunkards, they are of peculiar service. Patients who suffer from irritable or weak heart, needing at times an analgesic, can take them without untoward after-effects, knowing that the heart is being fortified. In delirium tremens, they relieve when there is a great restlessness with insomnia and general lowering of the nerve power. The pain of locomotor ataxia yields to treatment with Antikamnia Tablets in a remarkable degree, their analgesic power being of a peculiar kind, in that they will relieve painful affections due to pathological conditions of the peripheral nerves, as neuritis, etc., also lumbago, sciatica and myalgia. In chronic catarrh of the stomach, with its often accompanying headaches, in cardiac dropsy, and in ascites, they are of decided benefit."

GUDE'S PEPTO-MANGAN.

The Dietetic and Hygienic Gazette, commenting upon the dietetic value of Iron, says :

"Pathologists have given pointers as to the special condition of the iron in the system and in the circulating medium, and the newer preparations aim to imitate that condition. Most of them have a brief day of fame and then drop out of sight, for the reason that they lack some element of reliability. Few are standing the test of time and the critical ordeal of the clinicians. Foremost among these it is safe to name Gude's Pepto-Mangan. It is probably the nearest approach to a physiologic reproduction yet devised. It deserves its universal popularity, and its manufacturers do well to restrict its sale to strictly ethical channels."

From *Medical News*, New York :— 'Iron preparations spring up like mushrooms in a night. The one backed by clinical evidence in hospital practice is the old stand-by GUDE'S PEPTO-MANGAN, which is the standard of known worth and which gives positive results.'

CLINICAL EXAMINATION OF THE GASTRIC CONTENTS.

The New York Pharmacal Association have issued a handsome little booklet under the above title. It gives in brief form much excellent information, and contains some very attractive illustrations. The medical profession will no doubt appreciate this little book from the manufacturers of Lactopeptine.
