

Concrete Road Building Breaks All Records

63,500,000 square yards of Concrete highway pavement—equivalent to 6000 miles of 18-foot road—were built in the United States and Canada last year. This is nearly double the amount built in any other year.

People demand roads which give the greatest measure of service, saving and safety. That is why highway officials everywhere are building Concrete hard-surfaced roads. They know from experience no other road performs like Concrete.
