

MESSRS. LUNNEY & CO.'S NEW MILL AT HINTONBURG.

J. Lunney & Company have erected a new planing mill on Queen street, Hintonburg, the flourishing suburb to the west of Ottawa. It is a two-storey factory with modern equipment. The saws for rough work and the four planers are situated on the first floor. The shavings from each planer are carried to the furnace room through a special tube, power for the purpose being furnished by compressed air.

The light band saws, turning lathes and

scroll saws are situated on the second floor.

The machinery is operated by a 120 h.p. engine steam driven. All sawdust and shavings carried by the tubes above described are used as fuel. There is thus absolutely no waste. On the right side of the mill are two large drying kilns, heated by coils. Transportation is facilitated by a C.P.R. switch connecting with the mill yards. A gang of 30 men is now employed.

To Those Who Carry Insurance on Lumber

You are compelled to pay more for your insurance to-day than a year ago. This is particularly true in Canada where rates have been abnormally increased by Tarriff Association Companies. It is our business to insure nothing but lumber. We study the advantages offered by each risk submitted and accept only the best moral and physical hazards. Thus by carrying only selected risks we can offer lower rates. We are saving money for hundreds of lumber dealers. Why not let us take care of from \$1,000 to \$20,000 of your insurance?

For information apply direct to our home office,
