

*Solidity*.—This may also be expressed by the terms firmness and compactness. The more solid the pack the better the fruit will carry.

*Tailing*.—By tailing is meant the putting and placing of the last fruit into the barrel. All that is necessary in good tailing is to have the surface as level as possible with the stem end down when the apples are pressed. The care in tailing will be known when the barrel is open by the manner in which the fruit has been bruised when pressing.

W. T. MACOUN,  
Chairman of Committee.
