

TABLE OF CONTENTS.

Paragraph.		Page.	
	PROVISIONAL agreement.....	1	
	INSTRUCTIONS.....	3	
1-57 NARRATIVE.....	6	
58-93	}	10, 43, 44	
298-299		 OBSERVATIONS on the Islands.....
310-321		 OPERATIONS on the Islands.....
94-110 EVIDENCE.....	15	
111	19	
113-143	(a) Whether suckling females wander far from rookeries for food.....	19	
144-153	(b) Mortality of pups on the Islands.....	24	
154-162	(c) Length of time pups necessarily suckle and earliest date mothers resort to sea for food.....	26	
163-167	(d) As to the existence of "Banks" or sealing grounds around Komandorsky Islands.....	26	
188-206	(e) As to females which drop their young at sea or lose them on the Islands and found still in milk.....	29	
207-227	(f) Actual migration routes of fur-seals in the Asiatic Pacific and their winter habitat on the Japan coast.....	31	
228-243	(g) Average dates of landing and departure of seals to and from the Islands. Whether females land from the time they leave as pups, until they return to give birth to their first pup.....	35	
244-250	(h) The state of Komandorsky Islands in years of scarcity and abundance of seals at Pribylov Islands, and the effect of operations on either group upon the other.....	37	
251-258	(i) As to length of time female seals will bear young, or males will render efficient rookery service.....	39	
259-277	(j) The existence and habits of barren females and effete males.....	39	
278-290	(k) The condition of the rookeries compared with previous years.....	41	
291-322	(l) The presence of fish in the vicinity of the Islands.....	42	
323-337	(m) The efficiency or otherwise of the protective zone.....	46	
338 POINTS INCIDENTALLY OF INTEREST IN CONNECTION WITH SEALING INDUSTRY	48	
345-362 Distribution of seals at sea.....	49	
363-375 Numbers, condition and kinds of seals on the American coast.....	51	
379-387 Contents of the stomachs of seals.....	53	
388-395 Seals from the Rookeries can be determined.....	53	
396-398 Pups will swim by instinct.....	54	
399-402 Sexes can be distinguished at sea.....	54	
403-407 Copulation in the water.....	55	
408 Fishing Banks.....	55	
	REVIEW OF EVIDENCE AND CONCLUSIONS.	55	
409-436	(a & c) Wandering of suckling females, length of time pups necessarily suckle, earliest dates mothers resort to sea for food, and if they are killed by pelagic sealers.....	55	
	Remarks.....	57	
437-446	(b) Mortality of pups in the Islands.....	58	
447-451	(d) As to the existence of "banks" or sealing grounds around Komandorsky Islands.....	59	
452-455	(e) As to females which drop their young at sea or lose them on the Islands and found still in milk.....	60	
456-469	(f) Actual migration routes of fur-seals in the Asiatic Pacific and their winter habitat on the Japan coast.....	60	
470-472	(g) Average date of landing and departure of seals to and from the Islands, &c.....	61	
473-477	(h) The state of Komandorsky Islands in years of scarcity or abundance on Pribylov Islands, and the effect of operations on either group upon the other.....	62	
478-482	(i) As to length of time female seals will bear young or males render efficient rookery service.....	62	
483-488	(j) The existence and habits of barren females and effete males.....	62	
489-502	(k) The condition of the rookeries compared with previous years.....	63	
503-508	(m) The efficiency or otherwise of the protective zone.....	64	
509	TABULATED STATEMENT OF OPERATIONS AND POSITIONS OF PELAGIC SEALERS..	64	
510-512	SEIZURE OF BRITISH VESSELS UNDER THE PROVISIONAL AGREEMENT.....	70	
513-519	CONCLUSION.....	70
