

in order to make further Discoveries.— And in Latitude 64° , this Deponent discover'd a large opening call'd *Chesterfield's Inlet* ; up which this Deponent sail'd about thirty Leagues ;— where this Deponent found the said Opening to be about four Leagues wide ; and to the Westward it seem'd still to increase in Width.— And at the Extent of the said thirty Leagues up the said Inlet, this Deponent found the Water salt, though not in the same Degree as the Ocean ;— which this Deponent believes was occasion'd by the Snow and Ice melting at that Season of the Year. and the fresh water lying on the Surface ;— which is an Effect produc'd by the same Cause in the *Baltic Sea* in the Month of *June*.— And this Deponent also found the Stream of the Ebb to come from the Westward at the rate of five or six Miles an Hour.— And in that manner the said Stream ran down the Eastward for about eight Hours.— And for about two Hours more the Water stood still while it swelled upon the Shore.— And for about two Hours more a gentle Current ran up to the Westward at the rate of about half a Mile an Hour.— And afterwards the Current from the Westward ran with the same Violence, and in the same manner as before.— And this Deponent saith, that at the Extent of the said thirty Leagues up the said Opening call'd *Chesterfield Inlet*, this Deponent could not observe any Termination thereof, although the Day was perfectly clear, and this Deponent could see for six or eight Leagues farther.— And this Deponent saith, that neither of the said Openings was ever enter'd or discover'd by the *Hudson's Bay* Company, or any of their Agents, or by any other Person, as this Deponent verily believes, before this Deponent's Discovery thereof as aforesaid.— And this Deponent further saith, that in all the Places where this Deponent try'd the Tides in *Hudson's Bay* (which he often
