### Crop Killers Get After Corn And Prices Take a Sharp Jump

High Temperatures in Corn Belt Destroying the Crop—Oats Get a Sharp Advance Also—Wheat Slightly Firmer.

CHICAGO, July 5.—There was a wild fire market today in corn and oats. Heat and drought sent prices for both crops previously reached this season. Closing figures were strong at nearly the top point of the day, with corn up 4 1/2 to 5 1/2 net, oats at an advance of 1 1/2 to 2 1/2, and wheat showing a gain of 1/2 to 3/4. Provisions varied from 1/2 decline to a greater cost of 1/2.

Towards the end of the season, the market was far from dimming, but the market nearly a cent beyond the top-most figures reached before. One limited reason was that cash dealers reported no offerings of corn from the country. During the day the September option advanced from 54 1/2 to 55 1/2 and at the closing was 5 1/2 net higher at 55 1/2. In the oats market dealers were agitated to an extent seldom witnessed. According to one leading expert, sales today of a crop of 100,000 bushels was called for and besides the condition of the crop and the fact that the condition of the crop was estimated at 67.7, the percentage on oats was estimated at 67.7, compared with 80 last month. Iowa was officially reported as having fallen off 28 percent during June. Under such circumstances due mainly to lack of timely weather and moisture, an active higher market was inevitable. Outside limits reached by the September option, prices advanced from 54 1/2 to 55 1/2 and at the closing was 5 1/2 net higher at 55 1/2.

For the most part the sympathy of the market resulted from the fact of the wheat advance of corn and oats. Taking the day as a whole, wheat closing steady at 54 1/2 to 54 3/4, a net gain of 1/2 to 1 1/2. Liberal exports sustained hog products and the face of a big increase in the world's supply of lamb. When the pit was cleared out, wheat advanced 1/2 to 3/4, but the market had no substantial change.

Condition of wheat, 73.3, against 72.5 in May, indicating 250,000 bushels. Condition of oats lowest on record, 67.5, against 87.5 in May, indicating a yield of 80,000 bushels. Condition of hay, 68.1, lowest ever recorded, against 90.2 last year.

**Weather Report.**  
WASHINGTON, July 5.—Government weather report says: In spring wheat states, fairly moderate temperatures prevailed in Dakota and Montana. In corn states east of the Mississippi extremely hot weather prevailed during the latter part of the week, but many beneficial showers have fallen locally, and there was considerable moisture in the soil from the general rains of the preceding week. But at close of week ground became dry, and rain is needed in nearly all portions of those states. In corn states west of the Mississippi continued lack of rain is severely felt. In Oklahoma severe drought covers nearly entire state. Rain is needed in Arkansas.

## FRUIT WILL BE SCARCE AND MOST VERY HIGH

Reports From Country Districts  
Are Far From Encouraging—  
Drought Does Great Damage.

The wholesale fruit market at the foot of Scott street is about one of the coolest places in the city these scorching hot days, but even down in this shady retreat reports of the enormous damage being done thru the unusual weather conditions are right on tap all the time.

Strawberries are practically out of the market, but the quality was nothing to boast about, while the price range was from 10c to 12c per box. The season is over, and few of the retail stores had them on sale at all, alleging the price was prohibitive.

The raspberries coming in, too, are a mighty poor sample for the most part, and it looks as tho the citizens will not only pay big prices, but be very fussy to abuse (Virginia) prices. The drought has worked enormous damage. Charley Klump, down at the wholesale market, stated to The World that growers in from the Aldershot district yesterday had not stated that in some cases they did not know whether the crop would be worth troubling with. The raspberries sold on the streets yesterday at 10c to 12c per box, and in doubt if it even will materialize. They sold at from 13c to 16c per box in the crate.

There are no early potatoes worth mentioning coming on the market, and very few old ones, and even these are out of season. About 11.5c a bag and hard to get. New ones were said by some of the commission men to be worth from 50c to 75c per basket, and not a very big basket at that. So, cheer up, everything will be scarce and high.

Quotations are given below:  
Asparagus, basket ..... \$2.00 to \$2.50  
Beans, wax ..... 3.25 to 3.50  
Cabbage (Virginia) ..... 2.00 to 2.50

**Montreal Live Stock.**  
MONTREAL, July 5.—Canadian live stock market this morning the offerings were 625 cattle, 600 sheep and 200 pigs. The quality of the cattle was good, and the market was active. The sheep market was also active, and the pigs market was quiet. The market was generally firm, and prices were steady.

**Montreal Grain Prices.**  
MONTREAL, July 5.—There was a fair demand for foreign buyers for Manitoba spring wheat, and the prices bid showed an advance of 1/4 per quarter for No. 2 northern, but even this rise exporters stated that they were fully 1/2 per bushel out of line with values here. On the other hand, advice from Winnipeg reported a fair demand for No. 3 northern, and lower grades for export account.

The foreign demand for oats was also fair, and prices were steady. The market was generally firm, and prices were steady. The market was generally firm, and prices were steady.

**Chicago Gossip.**  
Erickson & Perkins & Co. had the following at the market:  
Wheat—Liverpool closed 1 1/2 to 1 3/4 higher than Saturday night's close. Our market generally followed the course of corn. After opening strong, it later reacted and ended the day at the high point, only to recover again in sympathy with corn. We do not feel bullish on the situation, but think the Russian crop will bear close watching.

## Montreal Exports Of Cattle Increase

MONTREAL, July 5.—The total exports from Montreal for the month of June, 1911, were 755 head of cattle and 494 sheep, as compared with 713 cattle and 2708 sheep for the previous month, showing a decrease of 358 head of cattle and 2214 sheep, and a decrease of 5078 cattle and an increase of 191 sheep, as compared with the corresponding month last year.

The total shipments for the season up to June 30, 1911, were 15,838 head of cattle and 3294 sheep, as against 15,033 cattle and 306 sheep for the same period a year ago, showing an increase of 805 cattle and 229 sheep.

The increase in the exports of cattle for the season so far is due to the fact that 753 head of American cattle were shipped from this port, as against none for the period year ago, showing that only 5303 head of Canadians were sent forward during the month of May and June. This accounts for the fact that Canadian northwest ranch cattle commenced to come forward in May, while this year not one has arrived to date, and none is expected before the month of August.

**TORONTO LIVE STOCK.**  
The railways reported 42 carloads of live stock at the City of Toronto, consisting of 563 cattle, 424 sheep and lambs, and 200 calves. The quality of cattle was fair to good. The cattle were slow, with prices easy for the best cattle, while cows and grass-fed cattle sold at from 20c to 25c per cwt. lower.

Prices for sheep, lambs, calves and hogs remained unchanged. The market was generally firm, and prices were steady. The market was generally firm, and prices were steady.

**UNION STOCK YARDS.**  
Receipts at the Union Stock Yards were 25 carloads, consisting of 865 cattle, all of which were bought up before 11 a.m. The quality of the cattle was good, and the market was active. The sheep market was also active, and the pigs market was quiet. The market was generally firm, and prices were steady.

**Chicago Gossip.**  
Erickson & Perkins & Co. had the following at the market:  
Wheat—Liverpool closed 1 1/2 to 1 3/4 higher than Saturday night's close. Our market generally followed the course of corn. After opening strong, it later reacted and ended the day at the high point, only to recover again in sympathy with corn. We do not feel bullish on the situation, but think the Russian crop will bear close watching.
