

# T. EATON CO.

190 Yonge St. Canada's Greatest Store. Toronto.

190 YONGE STREET, October 15, 1897.

**Cloak Elegance** Some stylish novelties now being shown for the first time in our Cloak Department are greatly admired by shoppers of taste. These are among them:

- Ladies' Light Tan Kersey Cloth Jackets, lined with choicest Roman stripe taffeta silk, star velvet collar, sizes 32 to 40. \$18.50
- Ladies' Fine Black Kersey Jackets, lined with heavy black satin, strapped seams, high storm collar, sizes 32 to 42, special at. 15.00
- Ladies' Fine Black Boucle Jackets, high velvet storm collar, lined with heavy twilled silk, sizes 32 to 38, special at. 15.00

No other place in Canada begins to display such style and elegance as is shown in our Cloaks. The height of fashion is represented here, with variety enough to satisfy all. Call and see for yourself.

**Things to Wear** For man, woman and child. No one has been overlooked. Old and young, rich and poor alike, can come here and select their needs from stocks representing the acme of style, assortment and quality, and not one dollar so spent could be used to better, or even equal, advantage outside this store. These are a few hints for Saturday shoppers:

## Hosiery and Gloves.

- Ladies' Ribbed Black Cashmere Socks, double heel and toe, fashioned foot. Very special at. 25
- Ladies' Plain Black Cashmere Socks, winter weight, full fashioned, double heel, sole and toe, extra fine finish. Special at 3 for 1.25
- Boys' English Worsted Hose, 2 1/2 rib, double sole and heel. Special 3 for 1.00
- Men's Ribbed Black Cashmere Socks, double sole and heel and toe, all sizes, regular sock socks, for 25
- Ladies' 4-button Blue French Kid Gloves, summer weight, colors black, brown, fawn, red tans and black, every size guaranteed, regular \$1.25 glove, for. 90

## WESTWARD, HO!

Report That Sir Charles Hibbert Tupper Will Resign as M. L. C. Halifax, Oct. 14.—Sir Charles Hibbert Tupper is in Pictou today consulting with his political friends on the question of his possible resignation as one of the representatives of that county in the Dominion House of Commons. It is announced that this step is rendered necessary because Sir Hibbert proposes to reside in British Columbia for the future, his intention being to become the law partner there of Hon. Frederick Porter, who is about to resign the Premiership of Prince Edward Island. Sir Hibbert is at present associated with

Borden, Ritchie & Chisholm of this city as a consulting partner.

## Alleged Illegal Practitioner.

David Boyer of Markham Village answered in the Police Court yesterday to answer to a charge of breach of the Medical Act. It is alleged that Boyer, who is not a qualified physician in Ontario, treated Rose March last. The prosecution is by the Ontario College of Physicians and Surgeons. The case was adjourned.

## More Troops for Cuba.

Madrid, Oct. 14.—Reinforcements of Spanish troops for Cuba are being hurried forward by the military authorities. About 5000 additional soldiers will leave Spain for that island before the end of the present month.

G. R. Davis..... 707 Queen east

Branch Office, 70 King-street east (next Postoffice), Hamilton. Telephone 561. H. E. Sayers, Agent.

## THE WORLD IN THE UNITED STATES.

The Toronto World may be obtained at the following places in the United States: New York—St. Denis Hotel News Stand; Broadway and 11th Street. Detroit—Peninsular News Co., 40 Congress street. Buffalo—Ingersoll Hotel News Stand. Montreal—St. Lawrence Hall Hotel News Stand.

## THE TREATIES WITH GERMANY AND BELGIUM.

Sir Wilfrid Laurier tries to excuse his attitude, when in England, with respect to preferential trade treatment for Canada, on the ground that our own action had been secured by the denunciation of the above treaties. He magnifies the little risk which England might incur by such action, and exaggerates the advantage which can possibly accrue to Canada thereby. He claims credit to the abortive legislation of the last session of the Dominion Parliament for having secured the denunciation of the treaties, a result which, he says, his predecessors in office had failed to accomplish after many years of endeavor. The fact is that many causes have combined during the past few years to convince the English Government that the terms embodied in these treaties which affected the colonies were inconsistent with the power granted to the self-governing colonies for regulating their own commerce and tariffs.

In 1891 a deputation from the United Empire Trade League waited upon the then, as now, Prime Minister, Lord Salisbury, for the purpose of urging, on behalf of the colonies, the release from the treaties with Belgium and Germany. In the course of his reply Lord Salisbury said: "With respect to those two unlucky treaties that were made by Lord Palmerston's Government, some thirty years ago, I am sure the matter of the relation of our colonies could not have been fully considered. We have tried to find out from official records what species of reasoning it was that induced the statesmen of that day to sign such very unfortunate pledges. We shall be glad indeed to take every opportunity that arises for delivering ourselves from these unfortunate engagements. The Government will carefully watch; and should some means of mitigating these evils may be found."

In a recent parliamentary paper respecting the termination of the commercial treaties between the United Kingdom and Belgium and Germany, Lord Salisbury, in stating the reason for their denunciation, points out that the clause providing that the products of Germany and Belgium shall not be subjected in the British colonies to higher duties than British products is entirely unusual in commercial treaties, is inconsistent with the complete tariff autonomy enjoyed for many years by the British self-governing colonies, and constitutes a barrier against the free trade policy of the British Empire. His Lordship intimates the desire of the Government to conclude new treaties similar to those denounced, except that for the clause objected to there shall be substituted one providing for the facultative admission of the British self-governing colonies.

From the above it appears that it has not been so much from a sense of generosity, but rather in accordance with law and justice, that the treaties have been denounced. That these treaties have operated to the advantage of Germany and Belgium is evident from the fact that they have cheerfully acquiesced in their denunciation. To pretend that in denouncing them England was incurring any great risk of losing its commerce with these countries is absurd. The London Statist, Aug. 7, 1897, in discussing this feature of the question, says: "But neither Belgium nor Germany is likely to place an artificial obstacle in the way of concluding fresh treaties, for neither has much to lose, even should the whole of the colonies grant preferential treatment to the produce of the Mother Country." The Statist shows:

Imports into the United Kingdom from Germany in 1896.....	134,242,402
Exports of British produce to Germany in 1896.....	108,250,426
Exports of foreign and colonial produce in 1896.....	51,132,776
Imports into the United Kingdom from Belgium in 1896.....	93,538,596
Exports of British produce to Belgium in 1896.....	38,038,564
Exports of foreign and colonial produce in 1896.....	21,947,945

Mr. J. C. Monaghan, United States Consul, Chemnitz, June 15, 1897, in a communication to his Government on the value of commercial treaties in Germany, says: "The trade treaties have helped Germany's exports. \* \* \* The Empire is as eager now to make such treaties as she was once indifferent."

All the talk about John Bull's generosity, and the immense risk incurred on his part, in the extreme. Equally silly is the contention that any great advantage has accrued to Canada from the denunciation of these treaties. The average amount of customs duties derived from Canada on merchandise imported from the United Kingdom has been about \$7,500,000 per annum. During the three years ending June 30, 1896, by the grant of a rebate of 25 per cent. on tariff rates an annual loss of about \$2,000,000 in our revenue will be sustained, and probably a good deal more, because, if

the preferential tariff is going to be of much benefit to England, it will be by increasing its exports to Canada at the expense of reduced exports from foreign countries. If this loss in customs duties would effect a corresponding reduction in the cost of all the goods purchased from Great Britain, there might be full compensation for the loss of revenue. But this is not to be expected. Without a preferential duty, Great Britain is compelled to scale its prices in accordance with the lower prices offered by competing countries. With preference varying from say 4 to 10 per cent. on value of merchandise, it will be enabled to obtain better prices for many articles, so that under the preferential tariff not only will its trade be enlarged but its profits will be increased. Where does Canada's share in increased trade and profits come in? Sir Wilfrid Laurier claims that these will result from the favorable sentiment now entertained towards Canada in Great Britain. Not a very reliable source of profit. Our trade and prosperity are to be increased by improving the quality of our products and reducing the cost of transportation. But this must be done by our own exertions and expenditure of our own money. Through the denunciation of the treaties we imperil our growing trade with Belgium and Germany; through the preferential tariff we sacrifice a large amount of revenue, and contribute to the enlargement of the trade and profit of Great Britain. Canada's recompense is seen in the denunciation of the last session of the Dominion Parliament. The Globe says that he has become the "hero of the nation," "his praise is in the mouths of all men." Not being able to discern any practical advantage which Canada is likely to derive from what has transpired, all the exaltation over Sir Wilfrid's policy and reception in England appears to be a childish conceit. For several years back Canada has exported hog products, but up to date nothing has been done in the exportation of the carcasses of cattle and sheep. The introduction of the cold storage system on the transatlantic lines between Montreal and Great Britain has made the new industry possible. Toronto is to be the scene of the new policy of exterminating the Argentine can be accomplished without European aid. It is difficult to understand how the suppression of the "European witnesses" of anything. And the Toronto evening papers of yesterday failed to recognize the manifest cooking.

"Old Rory" sends me a note asking if a Derby winner ever won the Cesarewitch. My answer is both yes and no. St. Gatien won the Cesarewitch for the Derby with Harvester, won the Cesarewitch in 1884, and the Cesarewitch in 1885.

Snow in England and summer sun in Canada. Still sturdy Kipping could sing of "Our Lady of the Snows."

Gen. Weyler appears bent upon having a delivery before he leaves Cuba. He released 40 prisoners yesterday. Perhaps he imagines by pursuing his present policy that the prospects for the future are even brighter. As for cattle and sheep, there has been a wonderful increase in this department also. Not only are the receipts of cattle rapidly increasing, but the quality of the animals is improving. The cattle are better bred and better fed. It is confidently believed that the business now transacted in the Toronto Cattle Market will in five years be double what it is. This city is consequently an admirable centre for the establishment of a dead meat business. There is an abundance of cattle to draw from, and the railway facilities for distribution are excellent. The new factory will start with a daily output of 150 to 200 sheep. The building contains great refrigerating chambers, where the carcasses can be kept in prime condition for weeks. Mr. Harris believes the business capable of great development. During the fall and winter seasons it is a risky business to ship live cattle to Great Britain. Mr. Harris believes that during this portion of the year at least there is more money to be made in killing the cattle here and shipping the carcasses in cold storage. Mr. Harris has great confidence in the possibilities of this business, especially if the Government will continue to give it the encouragement it deserves. Mr. Harris' factory will give employment to seventy-five hands. And the prospects for the future are even brighter. As for cattle and sheep, there has been a wonderful increase in this department also. Not only are the receipts of cattle rapidly increasing, but the quality of the animals is improving. The cattle are better bred and better fed. It is confidently believed that the business now transacted in the Toronto Cattle Market will in five years be double what it is. This city is consequently an admirable centre for the establishment of a dead meat business. There is an abundance of cattle to draw from, and the railway facilities for distribution are excellent. The new factory will start with a daily output of 150 to 200 sheep. The building contains great refrigerating chambers, where the carcasses can be kept in prime condition for weeks. Mr. Harris believes the business capable of great development. During the fall and winter seasons it is a risky business to ship live cattle to Great Britain. Mr. Harris believes that during this portion of the year at least there is more money to be made in killing the cattle here and shipping the carcasses in cold storage. Mr. Harris has great confidence in the possibilities of this business, especially if the Government will continue to give it the encouragement it deserves. Mr. Harris' factory will give employment to seventy-five hands. And the prospects for the future are even brighter. As for cattle and sheep, there has been a wonderful increase in this department also. Not only are the receipts of cattle rapidly increasing, but the quality of the animals is improving. The cattle are better bred and better fed. It is confidently believed that the business now transacted in the Toronto Cattle Market will in five years be double what it is.
