## Our Reception Day in Fall Millinery

FIRST IN  
MILLINERY

FIRST IN  
RIBBONS

BEST IN  
MILLINERY

BEST IN  
RIBBONS

What Paris and New York are to this store, this store is to the fashionable dressers of Toronto and Canada, viz., the fountain source for all that's correct, stylish and worthy in Millinery. In other words, the unequalled facilities of this store place the world's renowned fashion centres at the door of every lady in Toronto and vicinage. The mere announcement of our Fall Millinery Opening is sure to create great interest among those who appreciate goodness and merit in Millinery matters, and who recognize the fact that this store is Canada's Best Millinery Store—the one place where correct ideas in Millinery may be gathered, where up-to-date and ultra-fashionable patterns and novelties are displayed, where stocks possess all that is worthy of attention and deserving of a place in such a collection of elegance and excellence. Paris sends her prettiest designs and richest patterns; New York is represented with her charming styles and nattiest effects, while Canada, through the channels of our own work rooms, contributes dainty creations not a whit inferior to those that come from foreign centres, all combining to form an aristocratic array of style, elegance, richness and novelty the like of which Toronto has never seen.

### TUESDAY IS RECEPTION DAY IN MILLINERY AND RIBBONS.

An event of special interest to visiting Milliners attending the trade openings, and particularly so because our Millinery Stock and Display most truly reflects the correct fancies of fashionable dressers of this City. But no need to say more. On Tuesday morning Paris, New York and Toronto meet at this store, and we extend to one and all an invitation to come and catch glimpses and make notes of the Millinery fancies Dame Fashion has prescribed for Fall, 1899.

**T. EATON CO. LIMITED**  
190 YONGE ST., TORONTO.

### SMUT PEST IN FALL WHEAT.

The Grain Section of the Board of Trade Held an Emergency Meeting on Saturday.

### USE COPPER SULPHATE SOLUTION

Hot Water Would Kill It—All Farmers Urged to Treat the Seed.

The grain dealers of Toronto are greatly exercised over the appearance of smut in the new crop of Ontario fall wheat, and on Saturday afternoon an emergency meeting of the Grain Section of the Board of Trade was held to consider the matter.

Mr. M. McLaughlin, president of the section, explained that he had written to the Ontario Agricultural College, asking what remedies could be got for the prevention of smut, and had been greatly surprised to learn that the pest could easily be exterminated.

### Remedies Simple.

Bulletin No. 108 of the Ontario Agricultural College and Experimental Farm says, with reference to smut in wheat: "This disease can be so easily and so effectually treated that there is no reason why any farmer cannot practically rid his wheat fields from this trouble in a very short time. An experiment in treating seed wheat for the prevention of smut has been conducted on our experimental grounds during each of the three years with very gratifying results. Badly infested seed wheat not treated for smut produced a crop containing an average of 170 smut balls per bushel of grain, while that treated with potassium sulphate produced an average of 12 smut balls; and that treated with either copper sulphate or hot water an average of less than one ball of smut per bushel of grain. The treatment with copper sulphate was made by immersing the seed for five minutes in a solution of one pound of copper sulphate dissolved in one gallon of water. The hot water treatment in immersing the seed for fifteen minutes in hot water at a temperature of 132 degrees F. For this treatment the water should not go below 130 and not above 135 degrees. Every farmer who smut-infested districts should treat sufficient seed to insure the harvesting of clean grain for seed next year."

### Treat the Seed.

It was then moved by Mr. Carrick, seconded by Mr. Goodall, and carried: "That the millers and grain dealers composing the grain section of the Board of Trade view with grave concern the appearance of smut in some of the new crop fall wheat, that is being offered for sale. Experience has proven a serious thing with the farmer who grows it, the dealer who handles it, and the miller who makes it into flour."

"We would, therefore, urge on all farmers sowing wheat this fall, the im-

portance of treating their seed by one or other of the simple methods which have been found successful by the Experimental Farm."

### Pen-Bug Pest.

Another matter that was also discussed was the best way of getting rid of the pen bug, which is doing a great deal of damage to the crop. The only action taken this was the passing of the following resolution: "That all experience has shown that the only way to exterminate the pen bug is to discontinue growing peas for two years. The grain section of the Board of Trade, therefore, urge upon farmers who have this year been troubled with the pen bug the importance of not growing peas for a year or two."

### THE BIBULOUS COMMONERS

Temperance Reformers in England Are Getting Alarmed About the Dining and Wining.

### COMMONS RESTAURANT NOW PAYS

Though It Used to Be Run at a Loss—Practical Hotelkeepers Now Control the Business.

London, Aug. 27.—The temperance reformers are alarmed over the bibulous propensities of the present House of Commons. All the administrative energy which was formerly devoted to promotion of reforms now appears to be concentrated on the perfection of the catering department of the House. Certain it is that the Kitchen Committee has achieved more this last session than at any other. It made an immense profit out of its dining and wine arrangements, and has laid in a stock of \$40,000 worth of the choicest wines. It has installed a vat with a capacity of 800 gallons to mature its own Scotch whiskey. Until the last two sessions the catering, with a subsidy from the State of \$10,000 a year, no rent to pay, and all the appliances at the disposal of the House, was a losing concern. The Kitchen Committee used to be composed of housewives, and the change was wrought by the inclusion of two members who had made their fortune as hotel proprietors. Now they victual the House, placing their experience at the disposal of their colleagues, of course, without remuneration. The House of Commons restaurant has now become one of the best dining places in London.

### Elderly Ottawa Man Dead.

Ottawa, Ont., Aug. 27.—R. C. Featherstone, an elderly man, photographer, was found on a street last night and died an hour after being taken to the cells. He had been drinking heavily for some time.

On the old Government grounds, G. A. Ridd & Co.'s baseball team scored another victory by defeating Warwick Bros. & Co. The Nationals defeated the Welltons by 22 to 14. The Nationals have won 18 games and lost one.

### GRAND CHARGE FOR ORATORY.

The Windy City is Calling Together all the Elements for a Tornado of Eloquence Next Month.

### IT IS A CONFERENCE ON TRUSTS.

Labor Men, Bankers, Insurance Men, Merchants, Railway Magistrates and Politicians Included.

Chicago, Aug. 27.—The Governors of 21 States are to attend the conference on trusts, initiated by the Civic Federation of Chicago, and called to meet here Sept. 13 to 16. The call states the object to be "purely educational," and "strictly non-partisan," the Committee of Arrangements being composed of men of different political faiths, and representing all sides of the problem to be discussed. The subject for discussion is: "Trusts and Combinations: Their Uses and Abuses—Railway, Labor, Industrial and Commercial."

### Big Guns Will Be There.

Among the States named as having appointed delegations are: New York, with Chauncey M. Depew chairman; Ohio, John Sherman chairman, and Michigan, Russell A. Alger chairman. Acceptances have also been received from the Attorneys-General of 17 States and the Labor Commissioners of five States. Delegates are being named by Boards of Trade, Chambers of Commerce, national labor and agricultural bodies, the National Bar Association, the American Economic Association, the American Social Science Association, and the American Academy of Political and Social Science. The leading colleges of the country will be represented by professors of political economy.

### MABER MARRIED THE MOTHER

And Now the Children Have Put the Law to Work to Have the Bridegroom Arrested.

Montreal, Aug. 27.—Warrants were sworn out on Saturday for the arrest of Albert Bombar, H. Mabre and Walter Bombar, three well-known residents of Montreal, on a charge of conspiracy to defraud Arthur Chalmers, Lillian Chalmers, Arthur Chalmers and Mrs. Chalmers, the mother of the complainants. The police arrested Albert Bombar, who was admitted to bail, but the other two accused are at present out of town.

### STRUCK AGAINST DEAF MUTE

Trades Union Congress of Britain Will Have a Vexatious Question to Settle.

### MEN WHO STRUCK WERE BOUNCED.

Amalgamated Society of Engineers Charged With Sanctioning Blackleg Operations.

London, Aug. 27.—The Trades Union Congress, which will meet in Plymouth early in September, will have a vexatious question of discipline to deal with. A few years ago a deaf mute workman named Pentney began an apprenticeship as a smith, but without completing it, and was employed in other work for three years, because no fire could be found for him. A family of four was fed by this bread winner, and he was employed in order to protect against his employment as a smith. When a fire was provided, and he undertook to finish his apprenticeship, the strikers were discharged and two members of the Amalgamated Society of Engineers were employed in their places. The case was not taken up without some delay, and as the Amalgamated Society refused to discipline the engineers who were employed in the places of the strikers, it has been charged with sanctioning blackleg operations, and the Parliamentary Committee has deprived the Society of Engineers of the privilege of representation in the Trades Union Congress, where the whole subject will be threshed out. The outstanding issue is the miners' strike. An engineer had been chosen as presiding officer, but his place will now be taken by a member of the Typographical Union.

### HAVELOCK-WILSON AGITATES.

Has Started a Movement to Demand More Pay in Shipping Trade.

London, Aug. 27.—Shipping and trade troubles are threatened both at Liverpool and Cardiff. Agitation is active at these places for an increase in wages, on the ground that trade is now prosperous and that few men are unemployed. Joseph Havelock-Wilson, member of Parliament for Middlesbrough, a Radical, but who headed actively as long as it is not confined to a motive power. Mr. Clarke has the contract to report the coming international yacht race for the New York Herald by means of wireless telegraph.

### A Doctor Gone Insane.

Vancouver, B.C., Aug. 27.—Dr. Garrick of Victoria has been taken to New Westminster asylum. The unfortunate man was highly educated and an M.D. of Edinburgh University.

### Leaving the Grand Trunk.

Montreal, Aug. 27.—(Special.)—Mr. V. W. Powell, chief of the Grand Trunk statistical department, has resigned to accept a position in the Western States.

### THE TORONTO WORLD.

Hamilton Office, 70 King-street east (next Post Office). Telephone 304. H. E. Sawyer, Agent.  
London, England Office, F. W. Large, Agent, 145 Fleet-street, London, E.C.

### TREAT THE STRANGER WELL.

Few cities in America have such a standing advertisement as the Industrial Fair. Every year in Toronto. Thousands of strangers flock to this city from the neighboring Republic and from the sister provinces of Canada to see this Fair, which may rightly be called the greatest annual exhibition in the world. When these visitors come they spend their money freely, and the city receives material benefit. When they return to their homes they tell their friends and neighbors about the magnitude of the Fair and the beauties of Toronto as the leading residential city of Canada. There is no doubt that the fact that Toronto has become such a Mecca for Southerners in the summer season is mostly due to the advertising which Toronto has received from visitors attending the Industrial Exhibition. And Toronto is the Mecca of Southern tourists, as a visit to Jarvis and other residential streets any summer afternoon will prove.

Thousands of strangers will see Toronto for the first time during the next two weeks. It behooves all citizens to treat these strangers well. When they stop on the street and ask for information, say frequently be the case, take the trouble to enlighten them as to any details regarding Toronto, which these visitors receive that Toronto will be known to thousands of others when the strangers return to their homes. Take the time, no matter when or where, and give the visitor your best attention.

There ought also to be a large display of flags this week. Light your store windows at night and give the visitors the best possible impression of this live city.

### THE TRIAL OF DREYFUS.

Still the interest in the re-trial of Captain Dreyfus holds out. The cables seem to be carrying little else in the shape of news except reports and comments regarding the trial of this famous prisoner. The English papers are filled with long reports, and Englishmen talk of nothing else. Speculation is rife as to the outcome of the trial. According to some of the cable correspondents it will be an awful blow to the army in France if a court-martial composed of junior officers is compelled to acquit the prisoner, and there is conviction the army leaders who convicted Dreyfus of being a traitor, a forger and a fool of the first order. Still, the belief gains ground that Dreyfus will be acquitted. The character of the evidence received by the court-martial looks queer to the man who lives under British law—it is simply, for the greater part, the argumentative opinion of this officer or that officer that Dreyfus either is guilty or is not guilty. It does look, however, as if Counsel Lahori was driving the anti-Dreyfus generals who convicted the prisoner in 1894 into a very deep hole.

### TAKE IT EASY.

During the next fortnight great crowds of people will congregate in Toronto. It is possible, the best rule to adopt is to keep out of the crush. The traffic facilities on the streets of Toronto are sufficient for all purposes, and people should take it easy. At Exhibition time the man or woman who keeps out of the crowd generally reaches his or her destination as quickly as the more anxious ones, who get squeezed through entrance gates and pinched on trolley cars. Take your time wherever you are, and you will have no trouble.

### THE THREE NEWEST THINGS.

Mr. Clarke of New York Tells of Wireless Telegraphy, the Wireless Telephone and Liquid Air.

Mr. W. J. Clarke of the U. S. Electrical Supply Company, New York, who will show the wonders of wireless telegraphy, the wireless telephone and liquid air to visitors at the Industrial Exhibition this week and next, has arrived in the city. Mr. Clarke is a Canadian, a native of Trenton, Ont., and was manager of the Hamilton Electric Light Works while they were under control of the Canada Permanent Company. He left Canada in 1888, and is now in the scientific swim in New York.

Mr. Clarke is expected at length to the World last night just how wireless telegraphy had been made an accomplished fact. The wireless 150 feet high signal van be transmitted by the system, which is an improvement on Marconi's, a distance of 40 miles. Experiments are being made whereby the speed of the signals may be increased from 10 words to 40 words a minute, which is about the present speed under the old Morse system of telegraphy. Mr. Clarke has just been conducting a series of experiments for the United States Light House Board, and last week succeeded in transmitting signals with great distinctness between the light-house department at Tompkinsville, Staten Island and New York City, a distance of five miles.

The wireless telegraph system has been adopted by the United States signal corps, and is now in use between Washington and Fort Meyer. The system will also be adopted by the United States Light House Board. Wireless telegraphy will also be of great value in naval manoeuvres, as signals can be transmitted instantly from the flagship to the other warships, even if some of them are 25 miles away. This can be done in any atmosphere, and it was an impossibility heretofore to transmit signals in fog and during firing.

Speaking of liquid air, that wonderful invention of C. E. Tripler, Mr. Clarke said an exhibition of what could be done with liquid air would be given in front of the grand stand. At first it cost \$2000 to make a gallon of liquid air; now it can be made for five cents per gallon. Liquid air has a temperature of 320 centigrade below zero. It freezes mercury, so that it can be used as a hammer; it freezes alcohol into ice; making stick whiskey possible; and it freezes meat so solidly that it can be pulverized. It has the most explosive power of anything yet invented, and can be handled safely as long as it is not confined to its commercial value is for refrigeration. Mr. Clarke has the contract to report the coming international yacht race for the New York Herald by means of wireless telegraph.

### Bubonic Plague and Bullet.

Madrid, Aug. 27.—It is reported that a bubonic plague has developed in the province of Oporto. According to advices from Oporto, a capital of the province of the same name, northwest of "Big" Oporto, belonging to the sanitary station at Oporto, was killed to-day by a bullet from Portuguese territory.

### She's bound to have

Pearline, this lady. The grocer has just sent her one of the many substitutes, instead. You can't see the boy, but he's on his way back to exchange it. If all women were only as careful and determined, there would be less grumbling, and Pearline sales would be multiplied.

Probably no woman who uses Pearline would take anything else, knowingly. But since Pearline has become a household word, the ignorant and the careless suffer. The ignorant think that "Pearline" means any washing-powder; the careless fail to notice that they're getting an inferior article, instead of Pearline.

### Millions of Pearline

## TO ATTAIN LONG LIFE!

The following RELIABLE FIGURES from that great authority, The British Medical Association, are worthy of careful consideration. From 4,234 deaths they give the average age attained by drinkers as follows:

1. Total Abstainers..... 51 years, 22 days
2. Habitually Temperate Drinkers..... 63 years, 13 days
3. Careless Drinkers..... 59 years, 67 days
4. Free Drinkers..... 57 years, 59 days
5. Decidedly Intemperate Drinkers..... 53 years, 8 days

These figures show singularly enough that those who reach the shortest age are those who drink no alcohol whatever, after them come the drunkards, who only exceed them by a trifle.

The greatest average age is reached by those who drink moderately.—Review Scientific & London Daily Telegraph.

### The Following SCOTCH WHISKIES We Recommend:

	Per Case.
Bruce, Wallace & Co.'s Five Crown.....	\$ 7 50
Bruce-Mar (Very Fine and Old).....	8 00
Buchanan's House of Commons Blend.....	9 00
Buchanan's House of Commons Special.....	9 50
Buchanan's House of Commons White Label.....	12 00
Buchanan's Royal Household Blend.....	18 00
Haig & Haig *., Scots Whisky.....	9 50
Haig & Haig *., Liqueur Scots Whisky.....	14 00
Thorne's Kilty (Perfection of Whisky).....	9 50
Thorne's Kilty, Antique, Fine Old Liqueur.....	11 00
Thorne's Kilty, Old Scotch Liqueur, 20 years old.....	18 00
