

One of the number, John Roddick, came out and gave a good practical address to the boys on a Sabbath afternoon

We were glad when two of our boys volunteered for South Africa, Robt. Edwards in the Strathcona Horse and James Williams in Second contingent and we are sure they will acquit themselves with credit.

The day school is under Mr. Gardiner a most painstaking teacher.

The kindling wood department is still kept up. The boys also work the farm and do other light work.

Buildings are in capital repair but the main building requires painting.

The north field has been drained and what was formally a bog has been made a most productive piece of ground.

We tender thanks to our subscribers, we should have a much larger list, also thanks to Dr. Lindsay, Physician, the Press, and all who have aided us through the year.

We cannot close without expressing our entire confidence in Mr. and Mrs. Norman who are fully alive to all the requirements of their varied and trying position.

Respectfully submitted,

S. M. BROOKFIELD,

*President.*
