## MRS. RUSSELL SAGE IS DEAD

Former School Teacher at \$200  
a Year to Whom Came \$60,  
000,000 Fortune

New York, Nov. 4.—Mrs. Sage, widow of Russell Sage, capitalist, died early this morning at her residence in Fifth avenue from complications brought about by old age. She was ninety years old and had been in feeble health for several years. Three or four days ago her condition became serious and the end was unexpected. She was a widow of a prominent financial means and in her early life a school teacher at a salary of \$200 a year. Mrs. Sage, on the death of her husband, found herself the beneficiary of an estate of more than \$60,000,000.

Russell Sage at one time owned the Shore Line Railway between St. John and St. Stephen.

## PRaise FOR THE SHELL WORKS IN DOMINION

In its summary of the iron, steel, metal and machinery markets for the week ended Oct. 31, Canadian Machinery and Manufacturing News, Toronto, makes the following observations:—  
The warehousing business in Canada is surely coming to the point where it works in rather uncertain channels. For a long time material of less than one-eighth inch in thickness was not included in the embargo list, and firms that had a good connection at United States rolling mills had little trouble in "carrying on." Even when the War Trade Board turned down an application for the release of certain material—particularly plate—they often did so with the recommendation to "use some lighter material." This provided an easy way out, but now this lighter material is under the same ban. Canadian shops maintain a very high standard of efficiency on shell work. A party of French mechanical experts are in Canada at present, under the guidance of an interpreter from the dominion government. They have been in the United States for some months in connection with French orders. They state positively that in point of production and the well-planned arrangement of the sequence of operations, Canadian shell shops are absolutely the best in the business.

Inquiries for equipment in machine tool circles are mostly for 155 m.m. contractors. Those shops that are producing now are in much better position to add, piece by piece, to increase their output, than new plants are to go out for an entire outfit. Dealers have odd machines on standing orders, and delivery in this way is comparatively rapid. Supplies were sent forward this week for the mechanical equipment that is to accompany the Canadian expeditionary force to Siberia. Apparently nothing is being lost sight of that will be needed to make the force self-sustaining so far as repairs are concerned. Shipment was made to the embarking point at Vancouver. United States War Industries Board has given notice that the manufacture of

## Workmen's Compensation Act, 1918

## Notice to Employers of Labor

Every employer shall, on or before the 15th day of November  
Cause to be furnished to the Workmen's Compensation Board at the City of St. John, an estimate or estimates of the probable amount of the payroll of each of his industries within the scope of Part I of the Act, together with such further information as may be required by the Board for the purpose of assigning such industry to the proper class or classes, and of making the assessment hereunder.

And Further Notice  
That any Employer neglecting or refusing to furnish such estimate or information is liable to a penalty not exceeding \$20.00 per day for each day of such default, and is further liable for damages, as provided by Part II of said Act, in respect of any injury to any workman in his employ during the period of such default.

NOTE.—Forms for furnishing such information will be supplied on application.

sewing machines will have to be curtailed for the present.

Scrap metal dealers are having an off month. All those who have any stock on hand are apparently looking for purchasers, but purchasers are few. As a matter of fact, a large amount of this business passes directly from seller to melters, to the exclusion of the dealers.

—BUY-VICTORY BONDS—

## THE PERSONAL SIDE

(Montreal Gazette.)

There is a personal side to this Victory Loan of 1918 also, and it is a very important one. Every bond you buy is to your own profit. By making slight sacrifices you will be saving money that would otherwise be dwindled away in unnecessary trifles or pleasures. In the

savings bank your money returns you three per cent, while in Victory Bonds it brings you five and a half. The interest on the bond comes with unfailing regularity, and always will. The lesson is plain. Invest as much as you can in Victory Bonds. It is profitable for you to hold your bonds. But if, in a case of necessity, you need ready cash, you may borrow on your bonds, or sell them through the recognized agencies. They are easily negotiable. They are wealth in a most convenient form. So, for your country and for yourself, buy Victory Bonds.

Thompson-Barnes  
On Saturday at the home of Rev. J. A. MacKeigan, Miss Marion Irene Barnes was united in marriage to Sergt. James William Thompson, son of the late William and Elizabeth Thompson, of Apohaqui. The bride, who is a daughter of Mr. and Mrs. Titus Barnes, Apohaqui, was attended by Miss Gladys Scribner, and the groom was supported by Stanley Bailey. The groom is a returned man from the "Fighting 20th," and has done valuable service in France. After a short trip, Sergt. and Mrs. Thompson will reside in St. John. The groom's gift to the bride was a diamond ring.

## THE WAR INDUSTRIES OF THE MARITIMES

### Shall they lag for want of money?

WHILE the whole of Canada is called upon to produce with feverish activity the food, clothes, shoes and the thousand and one other war needs that must be supplied for Canada's fighting men, it is to these Provinces—the Maritime Provinces—that our armies look for those supplies that are peculiarly the products of New Brunswick, Nova Scotia and Prince Edward Island.

Iron and steel is perhaps the greatest need of all. We have the mines and industries to produce them.

Ships are needed with a need that is imperative and pressing. We are building them.

Timber is needed for those ships and for a hundred war-time uses. Our forests are providing them.

Fish, fruit, hay, potatoes and many other natural products of the Maritimes are in enormous demand. We are supplying them.

These and other Maritime industries have been speeded up—how?

By the energy of our people? Yes, by that and something more.

Our energy would count for naught without money.

And the money to finance these great achievements in production has been provided by Canada's war loans.

Canada must keep up the glorious effort she is making, and for this she must have money—money which she must obtain from her people.

And the men of the Maritimes will supply their share of the needed money. They will eagerly come forward with their applications for Victory Bonds.

Never laggards in war or in work, they will

to their utmost, not only to the limit of their resources but to the very limit of their credit.

Issued by Canada's Victory Loan Committee in co-operation with the Minister of Finance of the Dominion of Canada.
