It is of an entirely different species, and as a matter of fact the shells of the so-called pearl oyster are of far more value to those engaged in pearl fishing than the pearls. There are extensive pearl fisheries in the gulf of California, and some of the finest pearls have been taken from those waters. In 1891 one pearl—a black one—was sold for \$10,000 and every year since that time many pearls have been taken from the beds in the California gulf valued at over \$7,500 each.
