

LABOR'S FUNCTION

More Mine Sweepers Wanted

IN the Canadian Industrial Sea, loose dangerous and treacherous mines are still afloat in the form of Bolshivism, I. W. W.--O. B. U. ism and other radicals. The mine sweepers' work is not yet finished. The Straight Trade Unionist is hitching his mine-sweeping chains with Capital and slowly but surely the Industrial Sea is being cleared of the treacherous mines so that "Prosperity" may continue with full speed ahead.

During the dark days of Industrial Unrest the Sea was full of treacherous mines. Labor quickly realized that unless its mine sweepers co-operated with Capital the good ship "Prosperity" would go down to the bottomless depths. The claims of co-operation have been harnessed together and the "Labor-Capital Mine Sweepers" are working day and night to clear the Industrial Sea.

Canada's ship "Prosperity" is still travelling over troubled waters and the fleet of "Labor-Capital Mine Sweepers" must be replenished if we are to free the Industrial Sea of the most dangerous menace, loose mines.
