John D. Rockefeller Said to and believe the purchase a good one. Have Acquired the Iron Property.

An Immense Plant To Be Erected to Handle the Output.

If the news which reaches this city from Tacoma can be relied upon a mining deal of the greatest magnitude and importance to Victoria has just been consummated. The report is, briefly, to the effect that John D. Rockefeller, the milore, and all the accessories of a gigantic mining concern, will be installed.

In a lengthy article on the subject the pany, owned and controlled by Rockefeller. The iron mines will be operated by the mining company, and it is probable that development work will be com-

menced at once. The price paid for the property is a secret, but it is not hard to approximate the purchase price. Six years ago an effort was made to buy the mines and \$25,0000 was asked for the property. That was at a time when an iron foundry was taking a portion of the output and Northwest prices were much higher than at present. It is not probable much more than half this amount was paid

Rockefeller.

The Texada iron mines are the best in the West. The quality of the ore is excellent and the mines lay within two hundred feet of tide water. Steamers which would carry away the product could lie at that distance and load with the raw

Rockefeller will, in all probability, follow the purchase of this property with the erection of a plant which would handle the output of iron ore. There is at present no manufactory in the North-

west which would take the output.
There was a plant at Port Townsend, but this has lain idle for several years. The machinery is of an old date and the entire plant would require remodeling to the output of Rockefeller's new industry applause. and the erection of a plant becomes ne-

the United States at a slight cost. The duty on the raw product is much less than that on the faished articles of manufacture; so much so, in fact, that it would be a decided object to erect the plant in America to avoid the defference n duty.

The cost of shipping the

## Why do Some Women Grow Homely so Soon?

That's a question we ask ourselves every day as we watch the daily crowd great cities, in villages and towns. Women nowadays begin to lose their good looks before they are twenty-five; the lustre leaves their eyes, and the color cheeks, and in its place comes dulness, sallowness, muddiness, or any unhealth

pallor—and presto! beauty is gone. Wives and daughters, you do not take proper care of yourselves, that's why your good looks vanish. Our grandmothers and great grandmothers were wiser in their generation than are we to-day. They did not allow themselves to be so driven as we are, for their steady, continued health gave them strength enabling them to keep abreast of their work when it was finished, tired, but happy, not as we find ourselves today, bilious and constipated and gener-

Their secret will be found in the regular use of herb teas, prominent among them being preparations of clover tops and clover roots. These kept their digestion in good trim, and so made their blood pure and muscles strong. That's why they were so nimble on their feet, and could do their own housework till they were three-score and ten!

Karl's Clover Root Tea revives the use of this wonderful plant in our generation; its for-mula, prescribed by a famous Ger-
