

little to the N. E. of *Gallentry-Head* lay three small Islands, the innermost of which is the largest, called *Dog-Island*; within this Island is the Road and Harbour of *St. Peter's*; the Harbour is but small, and hath in it from 12 to 20 Feet Water; but there is a Bar across the entrance, whereon there is but 6 Feet at Low-water, and 12 or 14 Feet at High-water. The Road which lies on the N. W. Side of *Dog Island* will admit Ships of any Burthen, but it is only fit for the Summer Season, being open to the N. E. Winds; you may lay in 8, 10, and 12 Fathom, and for the most Part is a hard rocky Bottom; there is very little clear Ground; Ships of War commonly buoy their Cables; the best Ground is near the north Shore. Going in or out, you must not range too near the East-side of *Boar Island*, which is the Eastermost of the three Islands above-mentioned, for Fear of some funken Rocks which lie East about 1 Mile from it, and which is the only Danger about *St. Peter's*, but what lay very near the Shore.

Island of Co-  
lombo.

This Island is of a small Circuit, but pretty high, and lies very near the N. E. Point of *St. Peter's*; between them is a very good Passage, one-third of a Mile wide, wherein is 12 Fathom Water. On the North-side of the Island is a Rock pretty High above Water, called *Little Columbo*; and about a quarter of a Mile N. E. from this Rock is a funken Rock, whereon is 2 Fathom Water.

Island of  
Langley.

The Island of *Langley*, which lies on the N. W. Side of *St. Peter's*, is about 8 Leagues in Circuit, of a moderate and pretty equal Height, except the N. End, which is a low Point, with Sand Hills along it; it is flat a little Way off the low Land on both Sides of it; but all the high Part of the Island is very bold too, and the Passage between it and *St. Peter's* (which is 1 League broad) is clear of Danger. You may anchor on the N. E. Side of the Island, a little to the Southward of the *Sand Hills*, in 5 and 6 Fathom, a Fine Sandy Bottom, sheltered from the Southerly S. W. and N. W. Winds.

Island of  
Miquelon.

From the North Point of *Langley*, to the South Point of *Miquelon* is about 1 Mile; it is said that a few Years since they joined together at this Place by a Neck of Sand, which the Sea has washed away and made a Channel, wherein is 2 Fathom Water. The Island of *Miquelon* is 4 Leagues in Length from North to South, but of an unequal Breadth; the Middle of the Island is high Land, called the high Land of *Dunn*; but down by the Shore it is low, except Cape *Miquelon*, which is a lofty Promontory at the Northern Extremity of the Island.

Dunn Har-  
bour.

On the S. E. Side of the Island, to the Southward of the High Land, is a pretty large Bar Harbour, called *Dunn Harbour*, which will admit Fishing Shallops at half Flood, but can never be of any Utility for a Fishery.

Miquelon  
Rocks and  
Bank.

*Miquelon Rock* stretches off from the East Point of the Island, under the high Land 1 Mile and a quarter to the Eastward, some are above and some under Water; the outermost of these Rocks are above Water, and you have 12 Fathom close to them, and 18 and 20 Fathom 1 Mile off. N. E. half N. 4 or 5 Miles from these Rocks lies *Miquelon Bank*, whereon is 6 Fathom Water.

The
