TENT-SUMMER ARRANGEMENT

With half of fly turned over, showing ventilation openings, with net covering.

supplied to the Canadian Contingents in South Africa. This tent consists of a greenish-khaki duck, 18 feet by 25, with a white duck fly as above depicted. For winter use the fly is brought close on top of the tent, making a double wall. After trial in South Africa, both summer and winter, Lord Kitchener recommended its use in the British Army.
