

BAD BLOOD.**SYMPTOMS.**

Blotches,
Boils,
Eruptions,
Tumors,
Abscesses,
Bad Complexion,
Low Vitality,
Poor Circulation.

If we were asked to name the chief causes or source of disease in general we should unhesitatingly answer impure or imperfect blood. The blood is literally the life of the flesh, and there is probably no disease on record but what could directly or indirectly be traced to bad

blood as its primary cause, for we hold it to be a self-evident truth that, with pure healthy blood coursing freely through the veins to nourish and sustain the body, that body must be in a condition of perfect health. What the sap or juice is to the tree or plant, the blood is to the human frame. The blood often becomes loaded with poisonous matter, from irregular acting bowels, or with bile from an overcharged and torpid liver, or with an excess of uric acid from the kidneys, this latter causing Rheumatism and Neuralgia. And the poisonous secretions that should escape through those natural outlets, the bowels, kidneys and skin are circulated through the system in the blood, and break out humory eruptions and sores; or, if confined, lead to fevers, inflammations and other diseased conditions of the system.

CAUSE.—Scrofulous constitution or hereditary taint in the system, bad air, improper diet, and manner of living, bad drainage, inactive bowels and kidneys, weak lungs, torpid liver, and many other obvious causes, including want of cleanliness. As imperfect organic action makes bad blood, so, too, bad blood, in turn, makes imperfect action of every bodily organ.

CURE.—Observe strictly all the laws of health; keep the skin clean; the bowels and kidneys in perfect working order to carry off poisonous matter; avoid high living; have access to pure air and healthful exercise; eat plain nourishing food, and take Burdock Blood Bitters, the great key to health, which unlocks all the secretions by acting upon the four cardinal points of health—the Stomach, Liver, Bowels and Blood. In this manner Burdock Blood Bitters makes pure blood and insures perfect health.

Salt Rheum.

My wife has been troubled many years with Salt Rheum in the hands, and three bottles of Burdock Blood Bitters has cured them. You can make use of this if you choose.

TESTIMONIALS.

THE BLOOD.

I can truly say that Burdock Blood Bitters has done great good for me. Five years ago I received a fall which injured my side and did severe injury to my left lung. My blood became very impure, and I suffered greatly from sick and disordered stomach and shortness of breath, so that I became very much prostrated. All other means that I tried having failed I resorted to Burdock Blood Bitters, and after taking three bottles my health was restored, and I then felt like a new man.

I can recommend Burdock Blood Bitters to all who are broken down in health, and may be suffering as I was from bad blood. Yours sincerely,

Robert Baird

Jarrett's Corners, Ont.

Blood Poisoning.

Last August my daughter was taken ill, she went at once to the doctor and he pronounced it a bad case of blood poisoning; all his medicine failed to relieve her sufferings which were terrible. At last a friend of mine advised Burdock Blood Bitters. Only for it, I believe my daughter would have been a corpse.

I always recommend it as a cure for all blood diseases. SAMUEL GORMAN,
April 20, '85. Division St., Kingston, Ont.

For the last six months I was continually breaking out in pimples or small boils, especially about my neck. I thought it was because my blood was bad. I commenced to use Burdock Blood Bitters, and when I used two bottles I stopped. Since then nothing of the kind has troubled me at all. I also had a very poor appetite, and weakness bothered me continually; in fact I thought that I should die sometimes from exhaustion caused by the least exercise or excitement. The Burdock Blood Bitters has made me feel like a new man. I feel it my duty to give it the highest praise. As a medicine I think too much cannot be said in its favor; it is indeed the best blood mixture I have taken yet, and while I can procure it I will never have anything to do with any other medicine. In fact, if I always use it I won't need any other kind.
