of subjects are taught, so that every man, whatever his trouble may be, can pick out the trade or occupation offering him the best assurance of success.

One healthy, out-door occupation, fit for men who cannot do general farm work, is poultry-keeping. It is interesting to notice, therefore, that at Savard Park, Quebec, the men at the convalescent hospital have started an incubator; while 100 young birds are being fattened for the market by different methods. A group of the men have been on an excursion to the Dominion Government's Experimental Station at Cap Rouge, where they spent a day in the poultry department.

At the Esquimalt Hospital, Victoria, a Poultryman's Club has been organized and is making very satisfactory progress. At the same place rabbit-raising has been undertaken, and a correspondent describes "three men busy erecting a house under the direction of a fourth, who is so badly paralyzed that he cannot work. They reckon it pays to keep rabbits, and I am sure they are right."

Bee-keeping also is being taken up at Victoria; and there is talk of homing pigeons also to appear on the scene.

Questions and Answers.

Veterinary.

Mammitis—Fatality in Foals.

1. Cow calved July 30th. As her udder was very full I milked her before calving. Since calving her milk has not been fit for use. It will not pass through a strainer. The swelling has subsided, but there are some hard lumps. I had her tested with tuberculin and she passed all right.

2. I have a Clydesdale mare that I have bred to Clydesdale stallions. The foals were all large but unable to stand when born. The first one lived, but the next five died. I then bred her to a Percheron stallion and the foal lived. I then again bred her to a Clydesdale and the colt died. In all cases the bowels and kidneys acted normally. G. F.

Ans.—1. These lumps are indurated portions of the udder. Bathe the udder frequently with hot water, and after bathing rub well with hot, camphorated oil, and milk her at least four times daily until the milk becomes normal. When the inflammation has subsided and the milk has become normal, treat to reduce the lumps, but do not be greatly disappointed if the treatment is not entirely successful. Get an ointment made of 2 drams each of iodine and iodide of potassium, mixed with 2 oz. vaseline, and rub a little well into each lump once daily. Also give her 1 dram of iodide of potassium twice daily.
2. There is no reason why the foals by a Clydesdale should die and those by a Percheron live. All that we can recommend is to see that the sire is in good health and vigorous when the mare is bred. Then, during the whole period of gestation keep her in only moderate condition, and give her regular light work or exercise. Keep this up until the foal is born, and then give her a few months' rest. V.

The name of the City of Berlin, Ont., has been officially changed to "Kitchener."

A feature of the Exhibition at Toronto, particularly interesting at the present time, is a log bungalow showing the agricultural products of Northern Ontario.

Fifty lives were lost in a great hurricane that swept the British West Indies Island, Dominica, on August 28.

One thousand Chinamen have arrived in France to work in the munitions factories.

New England Training.—"Now," said a Boston school teacher to his class in English, "can anyone give me a word ending in 'ous,' meaning full of, as 'dangerous,' full of danger, and 'hazardous,' full of hazard?" For a moment there was a dead silence. Then a small boy raised his hand. "Well," queried the teacher, "what is your word?" Then came the reply, "Pious," full of pie!"

A Book About Money

How to get it. How to hold on to it, and how to make it work for you, will be sent free to everyone who writes for a copy and mentions this paper.

It's a book that has started many a man and woman on the road to owning sound, interest-paying investments.

Moffat, 11 miles east of Guelph, C.P.R.

Robert Miller Still Pays the Freight—And he is offering in Shorthorns some of the best young bulls and heifers that can be produced. Young bulls fit for service, some younger still; heifers ready to breed and younger, and some in calf. They are of the best Scotch families and some of them from great milking families. They are in good condition and made right, just what you want to make a proper foundation for a good herd, and suitable to improve any herd in the land. They will be priced so that you can afford to buy, if you will tell me what you want. Our business has been established 79 years, and still it grows. There is a reason.

ROBERT MILLER, Stouffville, Ont.

Females-SHORTHORNS-Females
