

Hogs Get Fat Faster

In the pens in the wallows, in the trough, a 1% or 2% solution of Zenoleum is simply wonderful in its power to kill germs of all kind of diseases, including the most resistant. Hogs troubled with lice or mite are given instant relief by 2 or 3 per cent. solution of Zenoleum. Nothing enables hogs to fatten faster than health and comfort, both of which Zenoleum gives them.

This great Coal Tar Disinfectant Dip has three times the disinfecting power of Carbolic Acid, yet is non-poisonous, non-corrosive, is not dangerous or injurious. Zenoleum is recognized as a reliable cure for eczema, mange, sore tail, nose-canker, mouth disease, scours, cuts, worms, abortion, etc. One prominent College Veterinarian writes, "Zenoleum is by far the best practical antiseptic on the market. Considering its cost and its value in this respect, no farmer can afford to be without it." Used by 60 Agricultural Colleges. Questions and Answers. Miscellaneous.

Vendor Removing logs, Etc.

A builds a wire fence on his farm and removes rails and piles them on his own land where they lie not in use for two years. He then sells farm to B.

1. Is A justified in removing said rails from farm or do they belong to B?
2. How long after selling farm has A a right to remove wood or logs from said land?

A. W.

Ontario.
Ans.—1 and 2. A may remove rails wood and logs at any time prior to the time for B's taking possession of the farm.

Material for Henhouse.

I would like to build a good, cheap henhouse this coming summer, and would like to know the size of pen to build and the amount of material required to house about 100 hens. N. M.

Ans.—There are different styles of houses which give fairly good satisfaction and the cost will depend entirely on the quality of material used in construction.

A house which gives very good satisfaction for 100 hens is 20 feet square about 4 feet 6 inches high at the back, and 3 feet high in the front, with ridge 7 feet high. The door is put in the east end, and a window 5 feet by 4 feet in the west end. The entire front, or south side is open, being covered only with chicken wire to prevent the birds getting out. The roosts are placed at the back of the pen, and experience has shown that there is no draft, even with the front of the pen entirely open.

This pen may be built of single-ply boards 8 or 10 inches in width, with 3-inch battens over the cracks. The roof should be sheathed with good quality lumber and then covered with roofing paper. On account of the roof being rather flat, the building paper is considered to be more durable than shingles. Two by four inch studding is used and the rafters are 2 by 6, supported by a ridge pole 2 by 6, which is supported in the centre by a post. Some poultrymen make a double wall on the north side in order to ensure greater warmth for the birds on the roost. A house of this style is in use on Weldwood farm, practically the only alteration being that steeper pitch is given the roof on the north side, in order to permit of a row of windows being put in the entire length of the building. This furnishes more sunlight to the back of the pen.

It is set on a cement foundation, and has a cement floor. If the ground is dry and the pen is filled in with sand or gravel, about a foot above the surrounding ground, the cement might be dispensed with. The following is a list of the material utilized in building the house: 42 pieces 2x4x12; 4 pieces, 2x4x16; 10 pieces 2x4x14; 6 pieces 2x6x12; 2 pieces, 6x6x10; 2 pieces, 2x4x14; 4 pieces, 2x4x12; 3 pieces, 2x4x10; 515 feet, 1x12x12; 25 feet, 1x12x16; 4 pieces, 1x6x14; 8 pieces, 1x6x12; 2 pieces, 1x6x16; 3 pieces, 1x10x14; 7 pieces, 1x10x12; 10 pieces, 1x2x12; 22 pieces, 1x2x14; 600 feet of sheathing; 70 feet, 2-inch matched lumber; 50 feet, 3/8 inch V matched lumber. A house of this style used to be built for about \$100, including everything. Price of lumber and labor is a little higher at the present time, but there is nothing to hinder anyone handy with tools from erecting a building of this nature. It is not essential that new lumber be used; it very often happens that there is sufficient old lumber stored away in the barn to construct a building as described.

Some poultrymen prefer a pen which will permit of a straw loft, claiming that it absorbs the moisture and keeps the pen drier; the chief difficulty being that the straw is a breeding place for vermin. If the front of the pen is raised much more than three feet we doubt the advisability of having it all open. When it runs around 6 feet, very good satisfaction is obtained by having the south side one-third glass, one-third cotton, and the remainder boards. Whatever style of house is built, avoid having it much longer than it is wide. The nearer square the less danger there is of draft.

Outwitting the Frost King

When the snow lies deep on meadow and pasture, the farseeing dairyman rejoices in his trusty Natco Silo. Sweet, juicy and free from mold, the silage holds the cows to full milk flow and puts flesh on the steers and fattening lambs. Your corn crop will go 40% farther when preserved in a

Natco Imperishable Silo

"The Silo that Lasts for Generations"

Built of glazed hollow tile impervious to air and moisture, and frost-resisting. It's the silo that needs no repairs—no painting—has no hoops to tighten. Strongly reinforced and fully guaranteed. Simple in design; only two shapes of tile used; any mason can erect a Natco. Will increase the value of your farm.

Send for our Silo catalog and our book, "Natco on the Farm"—both free. Tell us what you intend to build. We have valuable building plans—free. Write today.

National Fire Proofing Co.
1202 Dominion Bank Bldg.
Toronto Ont.

Let your scales tell! Let your record sheet tell!

Royal Purple Stock Specific will increase the flow of milk per cow from 3 to 5 lbs. per day during the winter months. It will enable you to fatten your steers and hogs a month earlier, thereby saving a month's feed and labor.

T. G. Delamy, Toledo, Ont., states:
"I have used a part of a package of your Royal Purple Stock Specific. I fed it to one cow according to directions. She gained six lbs. of milk while using part of a package. The rest of my herd reduced in milk while this one gained. I consider it has no equal."

Royal Purple Stock Specific

Good for horses, cattle sheep and swine. Royal Purple Stock Specific assists stock in securing all the nourishment there is in the food they consume. If you are feeding heavily for milk, or fattening stock, it assists them in digesting and assimilating all the food eaten instead of voiding it in an unused condition. Royal Purple Stock Specific is purely a digester and blood purifier. It will improve the condition of ANY run-down animal on your farm. This is our guarantee, and we will refund the money paid for it, should you fail to get results. If you have a poor, miserable, run-down, hide-bound horse in your possession, try it on him first and be convinced.

Robt. Cochran, Stella, Ont., states:
"I had a cow in very poor condition. I was induced by Thos. Hall to try your Royal Purple Stock Specific. In less than a week I found marked improvement, and I know I would have lost the use of her milk all summer had I not fed it. She is now in good condition. I also used your Royal Purple Poultry Specific for my fowl with equally good results".
Royal Purple Stock Specific is put up in 50c. packages, also \$1.50 and \$5.00 air-tight tins.
