**NEW BABY No. 2.**

Only Separator of large useful capacity that can be run by a "human boy." Buttermakers with ten cows or over lose money every day they remain without it.  
N. B.—This is not the machine that is to be withdrawn from the market because the manufacturers find it does not fill the bill, nor is it sold under a fancy name as English-made. It is not presented gratis to any government or official thereof to be used in travelling dairies or otherwise for the sake of advertisement, or for the purpose of saying they have endorsed it, but a challenge has been issued to all corners at the forthcoming Winnipeg Exhibition for close, quick, easy separating.
