Insure Now; Influenza to Last

ALL WISE, insurable persons are now insuring their lives for sufficient protection while it is to be had so cheaply. During the last four or five months, it is estimated, 50,000 persons in Canada have died from Influenza-Pneumonia, and authorities in the American Medical Colleges report that "there is no doubt that there will be a recurring severe Epidemic of Spanish Influenza for several years." In Switzerland, Scandinavia and Spain, where the disease raged over a year ago, it has returned. A recurrence of it has taken place in England and France, and may ere long spread to Canada.

Following the Influenza Epidemic of 1889-90 the death-rate remained high for several years; large American Companies paid 13 to 15 per cent. more claims in 1891 than in 1889. The losses experienced by our Life Companies from Influenza have been so great that they would be justified in asking large extra premiums to cover the heavy risks; yet all healthy applicants still get insurance at the old rates. Take advantage of them, and write us for our latest Annual Report.

See your nearest Agent of the Company, or write to either of the undersigned at Head Office for full particulars, stating your age at nearest birthday.

CHARLES H. FULLER,
Secretary and Actuary.
