## A PORTABLE TENT.

Roomy, Light, Strong, Durable and Easily Erected—Storm Proof in Almost Any Situation.

We show herewith an illustration, taken from The Scientific American, of an improved portable tent which is light and roomy, very strong and durable and capable of erection very quickly in a storm-proof and reliable manner, either on rocky, sandy or loam soil. The use of ridgepoles, upright and inclined posts and the numerous belaying pegs usually employed is entirely dispensed with, and in their place a pair of detachable frame arches and several anchors are used.

Each frame is made up of two straight and two curved wooden sections, and is braced by a rod formed at the ends with pins, which fit into sockets in the ends of the frame.

THE TENT ERECTED.

The frame sections are held together by metal socket pieces or couplings. In erecting the tent the two frame arches are spaced apart at a suitable interval and the tent cover is drawn over them.

This covering is made with strapped seams and is approximately semi-cylindrical in shape, with tapered ends, as illustrated. The latter are secured by pegs driven into the ground, and guy ropes extend from the top of the frame arches to a suitable anchorage on each side of the tent.

If the tent is erected on rocky ground a hook may be used to anchor the guy ropes, but in sandy ground the anchor is formed of a metal plate, from the periphery of which several wire strands extend to a common ring, to which the guy rope is secured.

The tent covering is formed along its edge with an outwardly extending flange, and the door of the tent opens into one or both of the tapered ends. Curtains separate the main body of the tent from these tapered ends.

MR. J. R. BOOTH.

A Railway Man Who Has Been Much Interviewed Lately.  
This is a portrait of the owner of the Canada Atlantic Railway, which it is reported Mackenzie and Mann and the Grand Trunk are both de-

MR. J. R. BOOTH.

sirous of obtaining, and of which the Premier said in the House the other day that the Government has been approached but would not entertain the purchase of just now.

Kitchener of Khartoum.  
It is exactly thirty-three years since "K. of K." the Commander-in-Chief in India—who June 24 celebrated his fifty-fourth birthday—entered the Royal Engineers. The early years of his military career were passed in unexciting work on the Palestine survey, and it was not until 1882 that he became familiar with Egypt, whence, indirectly, through the Sudan, he draws his titles, and he owes his titles to his work in the Sudan.

Not many people, perhaps, are aware that, although Lord Kitchener has never made a speech of any length, he is a known litterateur, has contributed to "Blackwood's," occupies a good part of his leisure in reading. Among novels he has a partiality for those of Sir Walter Besant, who was one of his oldest friends.

The Indian Commander-in-Chief is the bearer of several academic honors, and four years ago, along with the late Earl Dufferin, he was presented with the freedom of Edinburgh. It is sad news which the last Indian mails brings us that, although in other respects fully recovered, Lord Kitchener is likely to bear the mark of his recent accident in a permanent limp.

A New Alloy.

Invar, an alloy which when heated contracts instead of expands, has recently been invented by Dr. Guillaume, the physicist. It consists of nickel and steel, therefore of two metals which each for itself expands rather considerably in heat. Correct measurements have, however, shown that Dr. Guillaume has really produced an alloy which when heated expands even less than marble or wood and when slightly changed in their composition even contract when heated. Proportions of compositions of alloys have also been found so that they neither expand nor contract, but remain the same in all degrees of heat.

## MAKES MEN SOUND AND STRONG

Detroit Specialist Making Men's Diseases a Specialty for Years, Will Accept Your Case, Giving It Individual Treatment. You may Use It in the Privacy of Your Own Home.

You May Pay When You are Cured.

A Detroit Specialist who has 14 diplomas and certificates from medical colleges and state boards of medical examiners, and who has a vast experience in doctoring diseases of men, is positive he can cure a great many so called incurable cases.

DR. S. GOLDBERG.

The possessor of 14 diplomas and certificates, who wants no money that he does not earn, in order to convince patients that he has the ability to do so he says, Dr. Goldberg will accept your case for treatment, and you need not pay one penny until a complete cure has been made; he wants to hear from patients who have been unable to get cured, as he guarantees a positive cure for the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney troubles, heart disease, physical and nervous debility, lack of vitality, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up; so he has made it a rule not to ask for money unless he cures you, and when you are cured, he feels sure that you will willingly pay him a small fee. It seems, therefore, that it is to the best interests of everyone who suffers to write the doctor confidentially and lay your case before him, which will receive careful attention, and a correct diagnosis of your case will be made free of charge; if you have lost faith write him, as you have everything to gain and nothing to lose; you must remember not one penny need be paid until you are cured. All medicines for patients are prepared in his own laboratory to meet the requirements of each individual case. He will send a booklet on the subject, which contains the 14 diplomas and certificates, entirely free. Address him simply, Dr. S. Goldberg, 208 Woodward Ave., Room 617, Detroit, Michigan. Medicines for Canadian patients sent from Windsor, Ont., consequently there is no duty to be paid.

## A LITTLE HELP.

There's help in seeming cheerful  
When a body's feeling blue,  
In looking calm and pleasant,  
If there's nothing else to do;  
If other folks are wearing,  
And things are all awry,  
Don't vex yourself with caring;  
'Twill be better by and by.

There's help in keeping tally  
Of our host of happy days,  
There's never one that dawneth,  
But it bringeth cause to praise  
The Love that ever watcheth,  
The Friend that's ever near,  
So, though one trust with sorrow,  
One needs must dwell with cheer.

When troubles march to meet you  
Salute them at the door,  
Extend both hands to greet them,  
Their worst will soon be o'er.  
Beat down their stormy bugles  
With your own rejoicing drums,  
And, mailed in lofty courage,  
Accept whatever comes.

—Margaret E. Sangster.

## A NEW USE FOR THE CAMERA.

A new method of measuring for tailors has been patented in Paris. The person to be measured is placed before a camera, and between them is introduced a network that is photographed at the same time and serves as a standard. Certain artifices are necessary to obtain a complete result; thus the arm pits, etc., must be indicated by objects visible from without, and, finally, several views must be taken from various standpoints. The subject is also fitted with a sort of harness, which indicates points of comparison. These points may, however, be marked directly on the person instead. The relative positions of the camera, the network, and the subject are carefully adjusted, so that the subject appears always on the same scale, and then the photograph is taken from the various necessary standpoints.—St. James' Gazette.

## LET THEM DO THE WORK FOR YOU

If You Haven't Time to Give Your Stomach Proper Attention Use Dodd's Dyspepsia Tablets.

In these days of hurry and rush you may feel that you have not the time to give your stomach proper attention. You haven't time to chew your food properly; you haven't time to take proper out-door exercise. Let Dodd's Dyspepsia Tablets do the work for you.

Dodd's Dyspepsia Tablets will digest the food themselves. They will rest the stomach and bring back its health. They cure and cure naturally all stomach ailments.

Ademard Coderre, of St. Jacques de Lachapelle, Que., says: "I am happy to say I have been completely cured of Dyspepsia by Dodd's Dyspepsia Tablets. My Dyspepsia was brought on by inflammation of the stomach and I suffered with it for two years. I tried three medicines without getting relief before I began to use Dodd's Dyspepsia Tablets. Two boxes of them cured me completely."

Mamma—Did the teacher express surprise when she found out that you hadn't your lesson?  
Johnny—She boxed my ears, if you call that sending a thing by express.

Minard's Liniment is used by Physicians.

## LORD STRATHCONA.

Our High Commissioner in London Who Has Attained a Seat in the House of Lords—Knebworth Mansion.

Lord Strathcona's features are familiar enough to Canadians, but this latest photograph will be interesting. We have reason to know him as our wealthiest citizen, the president of our largest bank, our High Commissioner in Great Britain, the Chancellor of our second university, and one of the few Canadians who have attained to the honor of a seat in the British House of Lords. We have known him as munificent with his millions in times past, yet none of

his benefactions appealed so widely to public spirit as did his equipment, at his private expense, of 400 mounted rough riders for service in South Africa during the late war. It was a long stride that from the striding of eighteen exiled for thirteen long years on the bleak coasts of Labrador, an ill-paid clerk in a company, to the peer of the realm with his millions, able to bear the weight of so princely an offering as that which gave him a reputation as wide as the Empire.

In England, it may be interesting to note, Lord Strathcona lives, while out of London, at Knebworth, one of the most famous old mansions of Hertfordshire, with a history dating back as far as the Norman conquest, though as the ancestral home of Lord Lytton, the author, it is not without an interest more modern.

Knebworth survived a stormy transition from a Norman fortress held by Endo Dapifer at the Conquest, to become one of the most picturesque of Elizabethan mansions, where Queen Bess delighted to visit Sir Rowland de Lytton about the time of the Armada. It has owned in turn by Thomas de Brotherton, fifth son of Edward I.; the noted Sir Walter de Manny; Anne, wife of John de Hastings, Earl of Pembroke; Sir John de Hottot, Treasurer of the household of Henry VI.; Sir Thomas Bouchier, Knight of the Garter, and Sir William de Lytton, Governor of Boulogne. Like most historic houses of its kind, its principal apartments are the banquet hall, oak drawing-room, library, and the oak armory-room, where, in the days of Charles I., Pym, Eliot and Hampden were often entertained by Sir William Lytton. The whole mansion is crowded with trophies, armors and priceless memorials of historic days and deeds.

But of more interest to Canadians than its specimens of Italian and Dutch art, its famous music gallery connecting with its round tower, where John Hampden slept, is the human interest attached to the old place as the home of the poet, novelist, essayist, Lord Lytton, author and poet. The old place has its ghost, an uncanny housewife, who on occasions is said to bring her spinning-wheel to Knebworth, and the drone of its weird music strikes terror to its hearers when impending disaster hangs over the house of Lytton. The domain of Knebworth, church, village greensward, fern-bedged hills, the odoriferous grasses and waving reeds beside the lake, the majestic avenues of the park, with oaks that whisper of dead centuries, and ivy clinging like romance itself to every crook and cranny, make an ensemble fit to thrill the soul of the most prosaic visitor.

## Too Realistic for Irving.

Miss Ethel Barrymore relates a story of Sir Henry Irving, England's foremost actor, in whose support she appeared when he produced "Peter the Great." As told in Lippincott's Magazine it appears that at a rehearsal of the play in question at the Lyceum theatre, in London, a wonderful climax had been reached, which was to be heightened by the effective use of the usual thunder and lightning. The stage carpenter was given the order, the words were spoken, and instantly a noise which resembled a succession of pistol shots was heard off the wings. "What on earth are you doing, men?" shouted Sir Henry, rushing behind the scenes. "Do you call that thunder? It's not a bit like it."

## Handling Maximite.

In spite of its high explosive quality maximite is a very safe compound to handle and is practically unaffected by shock and will not explode by being set on fire, even if a mass of it is stirred with a bright hot iron. It will burn with a bright green flame and can be ignited with a match.

All this Mr. Maxim demonstrated by lighting a piece of smokeless powder and dropping it in a dish containing some lumps of maximite. He also melted lead and poured it over dry lumps of maximite, and, while it burned, freely like sulphur or wax, it did not explode.

In appearance maximite somewhat resembles sulphur, being yellow in color and quite hard. It is easily melted, in which condition it flows like molasses and is poured into steel projectiles.

## Her Latest Lover.

"Nell's just crazy over Shakespeare."  
"So he's her latest, is he? Where'd she meet him?"

## Properly Aerated Ovens

It is just as essential to eat fresh air as to breathe it.  
By an ingenious device applied only to

## Souvenir Ranges

fresh air is made to pass through small flues, over the top of the oven, just back of the hot fire box. Thus heated, it enters the oven and by a direct current of air the impurities and cooking odors are carried up the chimney.

This arrangement makes Souvenir ovens purer, sweeter, more active and easier to heat and manage than any others.
