Legislature will foreshadow no redistribution this session. Hon Mr. Whitney has all along contended that when a redistribution takes place an immediate appeal should be made to the Province on it. For this reason there will be no change made this year. A comparatively short session is expected."

The above is taken from a despatch dated Toronto, and if it is true, which seems at present quite certain, it will be unpleasant news for the quixotic editor of the Banner, who a short time ago was so confidently informing his readers that a redistribution in Kent would be sure to be considered at the next session of the Legislature. At that time he insisted that his dream would come true, even after Premier Whitney had designated the story as "Rubbish without the slightest NON_RESIDENT SENATORS."

NONe RESIDENT SENATORS.

A lively discussion arose in the House over the New Brunswick appointments to the Senate recently made by the Laurier Government, Mr. Crocket declared that neither Mr. Costigan nor Mr. Gillmor was a resident of the Province.

The former had his house in Ottawa, and only went to New Brunswick for hunting and fishing trips. He was a citizen and an elector of Ottawa, and was not qualified as am elector of New Brunswick. Likewise Mr. Gillmor has resided fifteen years in Montreal, where was his house and place of business. He was on the voters' list in Quebee,

To the Editor of The Planet:

outrage on the people, and still more and lasting shame on any governament which allows it to continue. Lake Eric shore, Canada side, is covered with pound nets owned by Yankee companies, who, it is well understood, subscribe liberally at election time. In a short time the finest fishing grounds in fresh water, Lake Eric, Lake St. Clair and the River Thames, will be useless. What a sin and a shame it all is. It affects all of us, the farmer who used to all of us, the farmer who used to have plenty of fish brought to his door quite often and at a very rea-sonable price; the residents of vil-lages, towns and ciries, all had plenty, also at very reasonable prices.
The fish in our waters belong to

than I can understand.

Canadians are patient and lawabiding; if they were not, few hours would elapse before the nets would be gone. I feel every confidence that right will prevail before very long; the only danger is that the fishermen, in their greed for gain, will destroy the people's food supply and the angler's pleasure before the Government stops them.
