

Farm and Garden.

Hay Making.

The period at which grass should be cut in order to best meet the wants of stock, is a matter of much consequence, and one which has received a large share of attention both from the Agricultural Press and those who are engaged in the practice.

When the elements and the grass are both in a condition favorable for the commencement of operations, it will not answer for any dallying on the part of the farmer.

Each season of hay-making as it passes away furnishes new proofs of the utility of hay caps, and he who, for the purpose of saving (7) a few shillings, or even dollars, refuses to invest against emergencies that may arise, is fully indulging the policy known "as penny wise and pound foolish."

Burning Sods and Weeds for Manure. The cheapest manure I ever used for fruit trees, blackberries, raspberries, potatoes, and most kinds of garden vegetables, is obtained in the following manner.

Miscellaneous. The oatmeal of the right hand which bewrayeth itself? What does that mean? It refers to the custom of perfuming, so common in ancient times and not unimportant now.

National Education in Ireland.

In passing through the country a few days ago, I met with a very intelligent looking peasant boy, with whom I got into conversation. He appeared to be about thirteen or fourteen years of age.

IMMENSE SIZE OF THE PYRAMID.—A United States naval chaplain who has recently visited the grand pyramid of Cheops in Egypt, wading in the deep sand fourteen hundred feet before he had passed one of its sides, and between five and six thousand feet before he had made the circuit.

SONS OF EMINENT MEN.—Sons of eminent men seldom amount to much, as they are generally content to imitate their fathers in their general conduct, and in their various occupations.

Speak Kindly. It is pleasant to speak kindly than unkindly, for kind words flow softly through the lips, and bless the heart that utters them.

Kind words will commonly go further than harsh ones. The sun with its genial warmth conquered the traveler whom blustering Borcas in vain attempted to subdue.

NO SUCH WORD AS FAIL!

A RESISTLESS REMEDY.

HOLLOWAY'S OINTMENT. THE FIRST HOSPITAL SURGEONS and medical practitioners of Europe, admit the unparalleled anti-inflammatory and healing properties of this Ointment; governments sanction its use in their naval and military services; and the masses in this country and throughout the world repose the utmost confidence in its curative properties.

DISCHARGING ULCERS.

A most remarkable and happy change is produced in the appearance of malignant ulcers, when a few applications of this Ointment. The surrounding tissues vasculate, and granules of healthy flesh begin to take the place of the discharged matter.

A WORD TO MOTHERS.

The young are the most frequent sufferers from external injuries and therefore every mother should have this healing preparation constantly at hand. It is an absolute specific for scalds, burns, and quickly removes the excoriated areas which sometimes disfigure the hands and faces of children.

SIGNIFICANT FACTS.

This Ointment is universally used on board the Atlantic and Pacific whaling fleets as a cure for scrofulic affections and as the best possible remedy for wounds and bruises. Large supplies of it have recently been ordered by the Sultan of Turkey for hospital purposes.

WOUNDS, BRUISES, BURNS AND SCALDS.

In cases of the fracture of the bone, injuries caused by steam explosions, Bruises, Burns, scalds, Erysipelas, ulcers of the joints, and contusions of the face, it is employed and warmly recommended by the faculty. This remarkable remedy has been introduced by its inventor into all the leading Hospitals of Europe, and no private household should be without it.
