PROGRESS OF DARYING IN CANADA

(By J. A. Ruddick, Dairyfuture. At one time Germany export-commissioner, Ottawa.)

There are no statistics, nor data from considerable butter, but the remark-There are no statistics, nor data from which statistics may be compiled, showing the annual production of milk and milk products in Canada. It has been the practice to estimate the purchasing power of the people to such an extent that the home supplies are growth of the industry by comparing unequal to the demand. The result is the figures of the exports of butter that Germany is now importing a quanand cheese from year to year, but as tity of butter, and the amount is anness figures do not include the home nually increasing. tion of these products, it is ob- While Germany does not offer as good gious that they fail to indicate the ac- a market for our butter as Great Bri

CROSSLEY AND HUNTER WILL VI-Calgary, Dec. 4 .- A conference of the calgary, Dec. 4.—A contended of the policy of the situation because it that the possible for Canadian and the countries to an almost indefinition of the countries to an almost indefinition of the calculation of the calcula extent. The increase in the con-ption of butter in Great Britain, Baptist, Moravian and Methodist

sumption of butter in Great Britain, has been so marked of late years shows no signs of falling off and this appears to be true in every country where butter is included in the daily diet of the people. The general improvement in the quality of the butter and the improved facilities for preserving it in a fresh condition have induceds many customers to butter their bread more freely than in the days when there was less strictly fine butter to be had and when much of it became rancid before it, was consumed. The increasing demand for food supplies in Germany will have considerable influence on the situation in the
