

Catarrh in the Head

Is a dangerous disease because it is liable to result in loss of hearing or smell, or develop into consumption. Read the following:

"My wife has been a sufferer from catarrh for the past four years and the disease had gone so far that her eyesight was affected so that for nearly a year she was unable to read for more than five minutes at a time. She suffered severe pains in the head and at times was almost distracted. About Christmas, she commenced taking Hood's Sarsaparilla, and since that time has steadily improved. She has taken six bottles of Hood's Sarsaparilla and is on the road to a complete cure. I cannot speak too highly of Hood's Sarsaparilla, and I cheerfully recommend it." W. H. FURNER, Newmarket, Ontario.

BASEBALL.

GUELPH DEFEATS LONDON.

Between 200 and 300 people shivered through the exhibition game yesterday at Athletic Park, between the champion Maple Leafs and the London Alerts. The temperature may have been favorable for playing ball, but there was no fun watching it. The game yesterday was hardly one to warm the spectators. It was rather a dreary exhibition. The monotony was relieved occasionally by Snider's kicking and his three-base hits, but it was never sensational. The Alerts ought to have won it. Sheere pitched good ball, and had he received the same support as Bradford would have won hands down. Snipp's two errors in the first innings were responsible for three of four runs, but "Doc" warmed up after that and played with his old-time ginger. Burton put up a great game at first, accepting 17 chances without an error. A feature was Congdon's fine catching in center and his remarkable throws to the plate, where he caught one man. The score:

CLEVELAND WINS AGAIN.

Cleveland won the second game of the Temple cup series yesterday with ease. McKean's work at short was gilt-edged. He accepted twelve out of thirteen chances—most of them hard ones. Between 8,000 and 10,000 people saw the game and it was necessary to establish a two-base hit ground rule. The teams will meet tomorrow and play the final game of the series in Cleveland on Saturday. Score:

Cleveland.....	7	10	2
Baltimore.....	2	6	4

Batteries—Cuppy and Zimmer; Hoffer and Clark.

THE TURF.

STAR POINTER'S FEAT.

Terre Haute, Ind., Oct. 4.—Star Pointer won the 2:10 pace today in one, two, three order. Frank Pace was the only one of the twelve starters to give him a contest. In

the first heat, if the favorite had been forced out in the last quarter, the mile would have been made in 2:02, but again tired in the stretch, and Govers stopped driving. The time 2:04, lowers his record three-quarters of a second.

CANADIAN NAIL COMBINE.

Montreal, Que., Oct. 4.—The nail manufacturers of Canada have been in secret session here during the last couple of days. It is intended to form a combination among Canadian nail makers to keep up prices and control the output of nails in this country.

ATHLETICS.

NO PRIZE FIGHTING IN TEXAS. Austin, Texas, Oct. 4.—The State Senate yesterday concurred in a few minor house amendments to its bill prohibiting prize fighting, and the bill was sent to the Governor in the afternoon. The balance of the special session will be devoted to matters of State interest suggested by the Governor.

DAN'S DILEMMA.

Chicago, Oct. 4.—President Dan Stuart, of the Florida Athletic Club, has wired the Associated Press from Dallas as follows: "Everything looks favorable for arrangement being completed within 24 hours. At present no one knows which way my face is turned, but when I give the location out I am certain to have it clenched."

THE WHEEL.

DAVIDSON BREAKS THE RECORD.

Toronto, Oct. 4.—In the presence of a number of people, Harley Davidson yesterday lowered the world's half-mile straightway bicycle record to 53.4-5 seconds. The run was made on Jarvis street, Toronto, at 6 o'clock.

MILE IN 1:47.3.

Hartford, Conn., Oct. 4.—Willie Windle, paced by a quad, rode a mile at Charter Oak Park yesterday in 1:47.3, which equals the record made by John N. Johnson at Minneapolis on Nov. 21, 1894. The quarters were made as follows: 26.1-5, 13.1-5, 1.21-2-5, 1:47.3-5.

McLEOD'S LATEST.

Toronto, Oct. 4.—On the island track yesterday afternoon Angus McLeod, of Sarnia, lowered the Canadian record for two miles, flying start, paced by singles, from 4:44 to 4:34.3-5.

QUOITING.

THE TORONTO TOURNAMENT.

Under the auspices of the Heather Quotting Club, of Toronto, a tournament is being held in the Queen City. Yesterday morning the first series was completed, with the exception of the finals. Those who are qualified for the finals are Wm. Kitchen, Toronto; Ralph Errington, London, and Joe Lawson, Brampton. Kitchen defeated Wm. McLatchie, Toronto, by 41 to 17, and Frank Claus, Belleville, succumbed to Errington after a rattling fine game by a score of 23 to 41. McLatchie and Claus will now play for the fourth and fifth prizes. The finals will be for 61 points, the number required in all championship events. The first prize is \$30, the second \$20, the third \$12, the fourth \$8, and the fifth \$5. The second series started yesterday. These are the actual facts of the series: Armstrong, Toronto, 41; T. Colwell, Toronto, 24; James Bell, London, 41; J. Forbes, Woodstock, 16; J. Burns, Montreal, 41; T. Sneeston, Toronto, 28.

THE SLEEP OF INFANCY.

Watchfulness Needed that No Ill Effect May Come of It.

Sleep is regarded as the time when only good arrives to the sleeper, and in the case of adults this is so; with children, however, the matter is different. The actual fact of sleep is good, but the matter of sleep is not always so by any means, for, during these periods of repose, a child may contract a habit of position which will cause a lasting deformity. In the first place, children are often put to sleep always on the same side, and thoughtlessly lays them that way. Sometimes this carelessness is caused by physical defects, but it mainly arises from habit. No creature on earth is more liable to habit than a tiny, soft baby, that you wouldn't think could possess any distinct quality. A mother, for some reason peculiar to herself, finds it most convenient to place the little one on its left side, we will say, for about three days; when the fourth day arrives master baby decides there is something wrong if he is put on his right side, and forthwith begins to squirm and twist until he fidgets himself awake. Mamma places him on the other side, and he serenely settles himself.

Constantly lying on one side will make a difference in the size of the limbs upon that side, and will even cause that side of the face to remain smaller than the other. Children will also draw up one leg in their sleep. This, too, becomes a fixed habit, and by the time the child has learned to walk a difference in the length of the two lower limbs will be noticed, a misfortune which might have been avoided had the mother been careful to watch the habits of the sleeping baby. In the bringing up of children it is not so much the care over things that counts, but the constant watchfulness against the "little foxes that destroy the vines."—Woman's Journal.

PERTH FALL ASSIZES.

A Verdict that Caused Surprise—Several Cases Disposed of.

Stratford, Ont., Oct. 4.—Dancy vs. Chisholm was dismissed on Wednesday, plaintiff's counsel not appearing when court opened.

Corbett vs. McCorquodale, an action for malicious prosecution, occupied the greater part of the day. The trouble arose out of the sale of a stove. The jury awarded plaintiff \$100 damages.

McCormick vs. Temperance and General Insurance Company, an action by the widow of the late Michael McCormick, of Listowel, against defendants on an insurance policy for \$2,000 on the life of deceased. Defendants contended the premiums were not paid. Judgment reserved.

Queen vs. E. Leeming—Criminal assault. Prisoner is a lad of 17, sent out from one of the homes to work on a farm, and he is charged with criminal assault on a 4-year-old girl. The case was concluded last night, the jury acquitting the prisoner. In discharging the prisoner, his Lordship advised the prisoner not to do anything else, as he might find so easy a jury. Mr. John Edington, Q.C., for the Crown; Mr. Harding for the defendant.

Boyle vs. Lamont, an action of trespass, was tried without a jury. The dispute is as to the right of way over a 40-foot strip of land lying adjacent to a lot which defendant purchased from plaintiff in the township of Cromarty.

Queen vs. James Stewart and James Cummings, larceny, lasted several hours. The prisoners are farmers living at A two, and they are indicted for stealing a quantity of beef from Jacob Clump, who keeps a slaughter house. The jury acquitted the prisoners.

Ronald vs. Durham, an action to recover from defendants the price of a fire engine sold to them. Defendants paid into court \$3,500, but the plaintiff would not accept. His Lordship ordered that the money in court be paid to plaintiff, after deducting therefrom defendant's costs.

Chatham show was a comparative failure also. Mr. E. Morgan, of Delhi, has paid out over \$14,000 for eggs since January.

Mr. Henry Walte, of St. Marys, is negotiating to establish a dye works in Exeter.

Galt's population is placed by the assessors at 7,374. The real estate assessment has been increased by \$23,375.

While at work on Mr. Paul's farm at Clinton recently, Mr. Mennell sustained a stroke of apoplexy, and has been very low.

The resignation of Rev. J. H. Kelly as pastor of the Louisville, Bethlehem, and Thamesville Baptist Churches, takes effect on Oct. 22.

John H. Taylor, near St. Helens, has been appointed collector of taxes in West Wawanosh for 1895, as successor to A. D. Cameron, resigned.

Chatham's medical health officer has discovered the lung of a steer badly infected with pleuro-pneumonia, which the owner tried to sell there.

G. Douglas Stanley, teacher in school section No. 5, Blanshard, has been paid the compliment of a re-engagement for the third year (1895) at a liberal increase in salary.

The population of Berlin, according to Assessor W. H. Bowman's figures, is 8,394. The population in 1894 was given by him as being 7,773, thus showing an increase of 621.

Fall wheat round about Delhi is growing rapidly and looks remarkably well. The farmers are digging their potatoes, which are of good quality and big yield. Corn is still coming in to the country store.

On Wednesday the residence of Mrs. L. J. Wilson, near the junction, St. Marys, was discovered to be on fire, but the blaze was extinguished by the flax mill operatives, and most of the contents were saved.

County Constable Westcott, of Exeter, says that James Rogan, an escaped and dangerous lunatic is running at large in the woods. He sometimes leaves his clothing in the woods and runs through the fields nude.

While a steam barge was passing up the St. Clair River Thursday morning some person fired at a horse belonging to James Nesbitt, Courtwright, killing the animal instantly. The authorities at Sarnia were telegraphed.

Mr. and Mrs. Thomas Condy, of Guelph, have gone to their new home at Scoresby, near Joseph, near Walkerton. Mr. Condy had been a resident of Guelph for 38 years, and for 23 years was sexton of the Congregational Church.

G. Collins, grocer and boot and shoe, of Watford, is offering to compromise; Fred Walton, jeweler, of Paris, has assigned; F. McCabbin & Sons, lumber merchants, of Sarnia, have called a meeting of their creditors for Oct. 4.

Yesterday afternoon, when the Erie and Huron train south was about three miles from Wallaceburg a buggy, occupied by Wm. Seward, was struck and wrecked. Mr. Seward was thrown some distance and badly hurt. His escape was miraculous.

A Guelph surgeon was called to Caledon near the Erin town line on Tuesday to attend a lady named Mrs. Dyer, who got kicked in the head by a colt. She was feeding the animal when she was thrown and the colt was a compound fracture of the skull, and it is doubtful if she will recover.

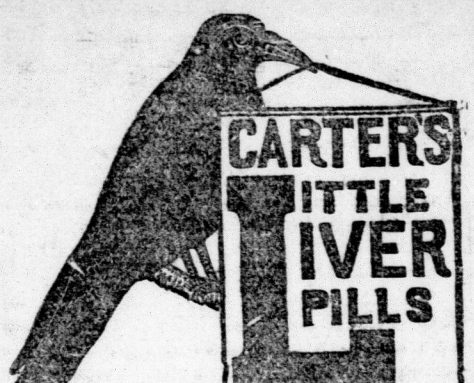

Some of the Salvation Army officers have recently changed stations. Capt. and Mrs. Wiseman went to St. Thomas; Capt. and Mrs. J. S. Symington, to Wm. B. Collins, J. Flintoft, S. A. Macgillivray, J. J. Jones and J. S. Symington. At a period meeting of the directors J. S. Symington was chosen president, S. A. Macgillivray, vice-president, and H. W. Mills, manager and secretary.

The Runciman foundry property on East street, Goderich, immediately opposite the Goderich organ factory, has been purchased for the new bicycle factory, and on Saturday the god was turned for the immediate erection of a new building 40x80 feet, three stories high. The present building will also be used in connection with the carrying on of the business. Some 50 or 100 men will be employed.

Recently Mr. and Mrs. Daniel Wood, of Exeter, went into the country to visit friends, and remained away fifteen days. They unconsciously took a dog along with them, and the dog, when they returned, without having eaten any food. When Mr. Wood opened the door the dog sprang out, and proved to be as lively as ever. They so thin that it was almost unrecognizable.

A pleasant social event was celebrated recently at the residence of Mr. Firman Howell, St. George, being the 60th anniversary of his marriage to Rachel Cassada, daughter of the late James Cassada. Mr. and Mrs. Howell were married at the age of 19 and 16 respectively. During all these 50 years death has entered the family but twice, removing one son and a grandchild. The couple were the recipients of many handsome presents. A very pleasing feature was the presentation by the son, Mr. J. Kinney and daughters, Mrs. J. Kinney and Mrs. J. Wood, of a handsome gold watch to their father and another to their mother.

CHANGING A CHURCH'S NAME. Minneapolis, Oct. 4.—The temper of the house of deputies of the Episcopalian Convention toward the proposition to change the name of the church was incidentally shown by its action yesterday morning on the invitation of the house of bishops to meet with deputies at noon to receive the visiting Canadian bishops. The resolution of invitation contained the words "The American Church." A Virginia delegate moved to amend by the substitution of the words "Protestant Episcopal Church of the United States," which is the legal title. This amendment was voted down by 82 yeas to 222 nays. A resolution to extend fraternal greetings to the Northern Minnesota Conference, now in session in this city, was at first tabled, but afterwards passed.

Small Pill. Small Dose. Small Price.

THAT MAN MONKEY.

The Fossil Not the So-called Missing Link.

But Its Discovery May Throw Light on the Evolution of the Human Race.

New York, Oct. 3.—The annual summer exploring party from the American Museum of Natural History returned home yesterday. The party was under the leadership of Prof. Wortman, curator of the Museum of Natural History, and contained, besides, Prof. Irving, of Columbia College, and several attaches of the museum. Prof. Wortman said yesterday in regard to the trip just completed:

"We first went to the Utah basin, and, after a few weeks there, crossed the Uinta range and began explorations in the Wasatch region, some times called also the latter Creek Desert. Our object in going there was to secure remains of an animal once quite common in that region and known to science as the Uintatherium. The remains of these fossils hitherto discovered consisted of extremely fragmentary and isolated parts of the skeleton. The find which we made last summer, and which has been written about as the missing link, was a complete skull of one of those monkey-like creatures which will go far towards settling the question whether they are true monkeys or lemurs. As nearly as I could judge from what is to be seen in the skull embedded in the sandstone matrix, I am inclined to think the animal it belonged to was a true monkey. If this proves to be the fact, it will give very interesting data respecting the rise of the monkey tribe, as well as its early connection with the next lower monkey-like forms of the lemurs."

"Then this fossil is a link, though not the one needed to establish the connection between man and the ape?" "Yes, its discovery may have a bearing on the evolution of the human race, but, of course, it isn't the missing link as that phrase is popularly understood. I have never made any statement which could be taken as justifying such a claim, and if I had I would only have made myself ridiculous among scientists. In fact, Wyoming would be about the last place a scientist in search of the missing link would go, because none of the higher forms of monkeys are to be found in that country."

"The Wyoming fossil is a specimen extremely interesting to the scientist, and the only one of the kind ever found. It will be prepared and studied, and, later on, will be put on exhibition."

"There's no doubt about the antiquity of this specimen, is there?" "Not a bit. From twenty years' experience I claim to be able to distinguish the difference between a petrified skeleton and a recent one. There is not the slightest doubt that this is a genuine fossil. It belongs to the Eocene formation of the region in which it was found."

"There has been, and still is, a lot of nonsense written about the missing link," continued Prof. Wortman, "but scientists are not worrying themselves about it. We can properly speak of a missing link at the present time."

"The discovery of the man-like ape of Java in deposits which are now generally admitted to be of the Pliocene age, the period immediately preceding man—goes a long way toward deciding the true anatomical position of the famous Neanderthal skull, which was also heralded as the missing link. There have been many bitter discussions over this famous relic, and opinion has been much divided as to whether it belonged to a man of inferior race or to a man of low brain development. With the discovery of the Java specimen and other remains at Soerabaya, we have now three widely separated and distinct examples of a race of men, who, there can be little doubt, were the immediate progenitors of the human family, and who, so far as their ancestry is concerned, stood half way between the anthropoid apes and the human species."

"When we speak of links in the chain of human ancestry we cannot stop with the anthropoid ape, but we must bring it into direct association with the lower forms of monkeys. The race has now arrived when we can say that with an extreme degree of plausibility there are no anatomical differences in the way of constructing a chain."

INTERESTING INTERVIEW
An American Will Make Arrangements With a Canadian Firm.

Ottawa (Special), Sept. 30.—An American who has been here interviewing the members of the Government on private business has left for Toronto, where it is understood he will try and make arrangements with the Canadian Medicine Company of that city, for the establishment of a manufactory of Dodd's Kidney Pills in New York State. He declined to specify the locality. During his stay in Ottawa he has been investigating the now celebrated case of G. H. Kent, who was saved by this remedy when in the last stages of Bright's disease, and has satisfied himself of the genuine nature of the case. He asserts that the medicine is now universally used throughout the State.

WE DON'T FOLLOW
In the wake of our competitors. We have struck out in new paths. We buy and sell for spot cash, and so can afford to sell cheaper than any one else in the furniture trade. Come and see for yourself. KEENE BROS., 127 King street, opposite Market House.

Black Dress Goods

Most excellent is the word. We get it for all points. Every day adds to the number. Each sale is a lasting advertisement; better than all the puff of printers' ink. We pride ourselves in selling merchandise with the proper ring; no spurious substances in the materials we sell. The dyeing is a special feature in all our Black Dress Fabrics—pure Sandringham Black Dye. No loading with chemicals to give weight to the fabric, at same time destroying largely its wearing qualities.

Prices

We will give but few; and to name many of the new cloths would convey no idea of their beauty and excellence.

Black Henrietta, a beauty, worth 60c, for.....	50c
French Twill, Special, worth 75c, for.....	50c
Bell Warp Serge, 54 inches, worth \$1.10, for.....	50c
Henrietta "Leader," worth 75c, for.....	50c

Ask to see these lines, and don't fail to look at the new ideas in Black Fabrics for the Fall of 1895.

C. H. BAYLEY

GRAIN CROP OF THE WORLD.

Washington, Sept. 27.—Consul-General Max Judd, of Vienna, has forwarded to the Department of State a report on the grain crop of the world for 1895, compiled from the report of the international fair, which Mr. Judd commends as trustworthy. The abstract furnished by Mr. Judd shows that the wheat, rye, barley and oats crops of Europe are somewhat below the average, while corn is exceedingly promising, and it is expected that the yield will be one-half again as large this year as it has been on an average for ten years. Canada shows an increase of about 6,000,000 meter centners in wheat, while India shows a loss of about double that quantity, both as compared with 1894. Most of the Russian provinces indicate an increase in wheat and rye. The Austria-Hungary wheat crop is poor in quality and less in quantity than usual. A lighter wheat crop is also indicated in the United States. The French wheat crop is estimated at 98 per cent, rye at 103 and oats at 95 per cent of the average. The wheat crop of Great Britain and Ireland is put down as poor, and is estimated at from 40 to 50 per cent of the average. The English barley crop will be better than the wheat crop, but the quality will be poor. Egypt will export considerable wheat. It is anticipated that the loss on wheat in India and the United States will be compensated for by the gain in Canada and Russia, and that the result for the year will be about equal to the average season.

The cut of the Chaudiere lumber mills will this season be at least 15-20,000,000 feet behind that of last year.
