IT RUINS HAIR TO WASH IT WITH SOAP

Soap should be used very spar-ingly, if at all, if you want to keep your hair looking its best. Most soaps and prepared sham-poos contain too much alkali. This dries the scalp, makes the hair

brittle, and ruins it. The best thing for steady use is just ordinary mulsified cocoanut oil (which is pure and greaseless). It's cheaper and better than soap or anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thorcleanse the nair and soup oughly. Simply moisten the hair and rub it in. It makes an abundance of rich, creamy lather, which ringes out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy

to manage. You can get mulsified coccunut oil at any pharmacy, and a few ounces will supply every member of the family for months.
