DAY AFTER DAY— YEAR IN YEAR OUT AN IHC PAYS BIGGEST — PROFITS —

NOT only should your cream separator pay you the best possible profit at the start—but it should keep on paying biggest profits for a lifetime.

The durability of a separator is just as important as its skimming qualities. Many separators break down just when they are beginning to pay for themselves. Avoid loss and disappointment by getting an IHC Cream Harvester. They skim as clean and run as easily years hence as on the day they were bought.

IHC Cream Harvesters

have proved their value by years of perfect service. If you investigate all cream separators you will appreciate IHC features and advantages all the more. You will find that IHC Cream Harvesters are the only separators with gears which are dust and milk proof and at the same time easily accessible; IHC Cream Harvesters are protected against wear at all points by phosphor bronze bushings—not cast iron or brass. IHC Cream Harvesters are constructed with larger spindles, shafts, and bearings than any other separator, insuring greater efficiency and durability; the IHC bowl is free from slots or minute crevices—that is why it is so remarkably easy to clean.

A Style and Size for You

Made in two styles—Dairymaid and Bluebell—each in four sizes. The IHC local dealer will be glad to explain the many IHC Cream Harvester advantages, all of which have much to do with your dairy profits. Ask him for catalogues and all information, or, write nearest branch house for information desired.

CANADIAN BRANCHES—International Harvester Company of America at Brandon, Calgary, Edmonton, Hamilton, Lethbridge, London, Montreal, North Battleford, Ottawa, Regina, Saskatoon, St. John, Weyburn, Winnipeg, Yorkton
