up in the mountains in an almost in-  
accessible position. Its surface is partly  
covered by stones. It is believed that  
volcanic action in the mountains above  
smelted the quicksilver out of the cinna-

bar ore, and that it ran down and filled  
this depression. A tunnel will be driven  
through the base of the mountain, and  
the quicksilver will be brought down by  
means of gravity.—Dundee "Advertiser."
