

RIDING MOUNTAIN PARK.

Withdrawal.

The two small areas being withdrawn from the Park were former sites of the Forest Officer's headquarters when the Park area was a Forest Reserve. These two areas are outside the main Park area.

Upon the establishment of the Park a more intensive administration of the area was organized under which it was found advisable to locate the park wardens inside the Park. The improvements upon these two small areas have been disposed of and the said areas are not now being used as they are in the centre of a farming district. It is considered they should be available for agricultural purposes. The total area of the two parcels being withdrawn is 320 acres.

The total area of the Park is approximately 1,148 square miles.
