ion at the Department to form one of the Dominion demics or minion; (b) pose of a addrequent occreate a coorganize cial Board or exist in ial Boards ealth; (e)

e, by oband to the ognizance animals, 2. To induce the Federal Government to make provision for the establishment of an efficient, thoroughly equipped Hygienic Laboratory with a staff of competent men by which satisfactory investigations and inquiries may be carried on relative to the sources and causes of outbreaks of infectious and contagious diseases in the Dominion and for making the results of such enquiry known.

(3) To secure the publication, in athly or oftener, by the Federal Government, of an official, Health Bulletin, containing such information as may be obtained by the means above mentioned, and otherwise, and also to secure the free distribution of the same to all health officers, public institutions, local papers, clergymen, medical men and others, for the

instruction of the public.

(4) To promote needful sanitary legislation, Federal and Provincial, and to encourage a liberal expenditure of moneys for public be alth purposes by the various authorities, municipal and other, for dressewerage, parks, squares &c.,

(5) To hold annual public meetings or conventions (as, for example, in Ottawa during the Session of Parliament, and in other places on suitable occasions) for the reading of papers and giving addresses on practical health subjects by sanitarians and discussing the same.

(6) To encourage the publication of special health literature,—pamphlets, sheets, rules and regulations, &c., and, if thought desirable and practicable, to issue a regular periodical or "organ" until the Government deems it advisable to assume this responsability.

(7) To provide for lectures in various localities, under the auspices of local branches of the Association or of the local or municipal boards of health or otherwise.

(8) To use all available means to induce the local daily and weekly newspapers throughout the Dominion to co-operate in the above indicated work for interesting and instructing the people.

(9) To encourage the formation of societies of women for the promotion of household, school, factory and shop sanitation &c.

(10) To induce the clergy of the various denominations to interest their parishoners, both from the pulpit and in the family, in all measures pertaining to public and individual health.

(11) To give prizes, when possible, for certain needful sanitary appliances and im rovements, as in dwellings including the surroundings, &c.
