### Paterson-Bethlehem in

U. S. Soccer Final

The steel workers easily held their opponents, scoring two in the first half thru Fleming and Millar, while after the in
Tunner of the steel workers easily held their opponents, scoring two in the first half thru Fleming and Millar, while after the in
Tunner of the more goals were added by Millar twice and Fleming. Twenty-five hundred people 4.1 with the game.

Harrison, N.J., the crack Paterson soccer team knocked out the Morse Dry Dock eleven by 4 to 1 in the eastern semi-final of the national challenge cup competition before 5,000 people. At half time the score was 2 to 1 in favor of Paterson but after the interval the Dockers were outplayed at all points of the game.

Paterson will now meet Bethlehem in the final next mouth which will probably be played off at Pawtucket, R.I., or Fall River, Mass.

PROTECTION is to-day the key-note of international trade preparations.

GREAT BRITAIN is restricting imports and PROTECTING home industries.

Acting Premier Watt of AUSTRALIA announces the introduction of a measure for higher PROTECTIVE duties.

FRANCE is exercising Government control of imports to build up home manufactures and home markets.

ITALY'S after-war programme calls for a higher PROTECTIVE tariff.

A higher tariff for the UNITED STATES is forecast by Chairman Fordney of the Ways and Means Committee of the next United States Congress, who will be the author of the new tariff bill. Congressman Gillett, of Massachusetts, who will be the Speaker of the House of Representatives in the new Congress, says, "at the earliest opportunity there should be passed by the Republicans of the House a protective tariff measure which will provide more abundant revenue and prevent an inundation of foreign goods produced by cheaper labor."

GERMANY depends on PROTECTION to recover its commercial position.

Under PROTECTION, CANADA has successfully borne the burden of four and a half years of war. Wages have been high and agriculture and industry have prospered. The present is no time for economic experiments.
