### NIAGARA CAMP BREAKS UP AFTER GOOD REVIEW

General Otter Expresses Satisfaction at Showing of Troops-Body Guards Lead March.

NIAGARA - ON - THE - LAKE, June 21.-(Special.)-With the annual review of troops, which finished just before 6 o'clock to-night, the field duties of the soldiers in camp were wound up for

The brigades were reviewed by Brig.-Gen. Otter, near whom sat Rear Admiral John Denison of the British GULIWIN SMITH PRIZE navy, a keenly interested spectator. Both the general and rear admiral expressed themselves as exceedingly well pleased with the progress made by the army of raw recruits in the short period anotted to them by the govern- Donation Announced at Presenta- Send for particulars to

Upwards of 10,000 people witnessed the spectacle.

When the full strength of the camp was lined up the four brigades stretched a good mile from north to south of the commons. The cavalry brigade in front of the ranks.

Weekly Bulletin

Toronto, June 22, 1907.
The market conditions of the Cobalt The market conditions of the Cobalt stocks remain practically unchanged. Lower levels are being found by all of them with the exception of Silver Leaf. This stock has been quite strong on reported finds. Our report on this property shows that the vein discovered is a very good one, nothing, however, to become over-enthusiastic about. This stock is safe to sell on bulges, and buy on reactions.

actions.

Silver Queen people are adapting a good policy by advising the shareholders as to the conditions of their mine. They still show that they feel resentment towards any of their shareholders who would think of disposing of their stock. If this company will keep on mining, the market will take care of itself.

The Foster Mine is the only cloud that now hangs over the Cobalt market, and we believe that after the shareholders meeting on the 27th inst., when this is meeting on the 27th inst., when this is cleared up and the worst is known, the whole market will strengthen con-siderably. We do not look however, for any rapid advances until later in the

fall.

Nipissing Mine is uncovering on an average of one new vein per day. The camp never looked so prosperous as it does now. Everybody is busy and the work that they are now doing is sure to tell on the market later in the season. Our advice is to buy Trethewey and Nipissing on these levels.

Yours very truly & CO.

### THE HIGHEST RECOMMENDATION

for the shares of the LUCKY BOYS GOLD MINES, LIMITED, is the fact that large blocks are being rapidly subscribed for at Cobalt, Haileybury, New Liskeard and Larder Lake. We are receiving letters from mining engineers and miners every day reserving large blocks of LUCKY BOYS shares. These men have been over the ground, and in all of the letters we receive from them they say that the properties are even better than we represent them, and that LUCKY BOYS will be the greatest and most profitable mines in the Larder Lake district. The fact that these experienced men are investing their own money in LUCKY BOYS should be sufficient to satisfy the most skeptical. Miners employed on the nearby mines are all pinning their faith to the LUCKY BOYS. They are buying all the shares they can. They realize what a splendid investment they are getting in buying LUCKY BOYS at SIX CENTS PER SHARE. They know a good th - when they see it. Are you going to join them in making a fortune? Bankers and conservative business men throughout the whole country are now buying LUCKY BOYS for their investment. We strongly advise our clients not to hesitate, but buy LUCKY BOYS to-day at SIX CENTS PER SHARE. We have only one million shares to dispose of at this price, and at the rate that these shares are being absorbed we predict that they will not last long. The public will be falling over themselves six months from now trying to buy

## LUCKY BOYS

at One Dollar per share or more. We strongly urge the immediate purchase of these shares. We are placing our own funds in it and we are liling to stake our reputation on the merits of LUCKY

The LUCKY BOY, properties consist of 20 claims of 40 acres each, making a total acreage of 800 acres. Some of the claims adjoin the famous Reddick claims, others adjoin the Proprietary Gold Fields, and others adjoin the wonderful Blue Bell roperties.

We have sent our own mining engineers to examine and report on the properties, we have looked exhaustively into the merits of LUCKY BOYS before offering the shares to our clients. We question if an opportunity like this will ever present itself to you again. We advise our clients to buy

We odvise you to buy all you can, you are bound to greatly profit thereby. The stock of the LUCKY BOYL is actually worth a great deal more money than the price we are asking for it. Our engineers figure there is in sight on the properties of this Company gold equal to many times the par value of the total capitalization of the Company. All it requires for investors to make money is to have faith and confidence in the LUCKY BOYS proposition, and we strongly advise investors to put every dollar that they can in these shares at the present price.

Could you visit the Larder Lake district and examine the properties, as we have done, you would not hesitate a single moment in placing every dollar at your command in the shares of LUCKY

# 6 CENTS PER SHARE

(Par Value, \$1.00. Fully Paid and Non-assessable.)

It should be noted that all of the Directors of the Company are well-known and successful busimon—not men that are simply interested in a mine—but men that are miners in every sense of the word, and who know how to operate, maintain and conduct a mine in a besiness-like manner, and who have been connected with the strongest and most successful mines in the Cobalt camp. These entlemen are just the kind of mining men that investors should be glad to become identified with.

The fact that some of these gentlemen, who are Directors of the Company, and originally owned a part interest in some of the LUCKY BOYS claims, are buying the shares at 6 cents each with the cash that they receive for their interest in the properties should be sufficient to satisfy the most sceptical. These men know what a splendid investment they are getting in buying the shares at 6

The mineral production during the current year has been remarkable as compared with former records, and it will be still greater in 1907. Remember, when you see the enormous advances in the prices of Larder Lake mining securities that are coming immediately and that will continue for months and months, if not for years, that we told you to select one or more good stocks, and that small investment in them will yield inside of a very short time enormous profits that would be imp ssible in any other industry.

We are not trying to sell stocks of LUCKY BOYS to uneducated or half-witted people. We are trying to interest legitimate business men in a proporition that we believe will turn out to be one of the greatest of its kind the world has ever known, and again we say, if you are not in a position to hold this stock until such time as the LUCKY BOYS GOLD MINES, LIMITED, properties are developed, we do not want you to buy it. A mine cannot be developed in a day any more than a railway of 50 miles can be built in an hour, and no railway ever paid dividends or ever amounted to anything until the trains were running, and a mining property cannot amount to anything until the ore is being treated. People who purchase the stock of the LUCKY BOYS cannot expect the Officers and Directors of the Company to pay dividends until dividends are earned. We do honestly believe, however, that before the present summer is past LUCKY BOYS will be paying dividends to its stockholders. We are in business to-day and we propose to stay in it while there is any business to be had, and we can say to you now that in some years to come we expect to be counted among the financial houses that are spoken of and referred to in the highest terms by investors.

When we offered the first block of Blue Bell shares, we predicted that the Larder Lake district would be the greatest gold district in the world, and our predictions are being endorsed daily by miners arriving from the golden north with the beautiful specimens of pure free gold. These men fully endorse our predictions. The time is not far listant when the eyes of the whole world will be

concentrated upon the wonderful golden north of New Ontario. A year ago very few white men had trodden the trail through the Larder Lake district. Today the greatest stampede the world has ever known is taking place. Capitalists, mining engineers and prospectors are now "hitting the trail" and hurrying through as fast as they can. Millions of dollars will be offered for some of the Larder Lake properties within the next few months.

THOMAS McCAMUS, President.
