New Design Optical Instruments

1. Reference your 55/3773/1 SDW dated 13 Jul 45.
2. The descriptions of three optical instruments designed and developed by N.V. Optische Industrie have been examined by the appropriate consultants of the Invention Board including National Research Council and Research Enterprises Limited.
3. The consensus of opinion is that there is no particular evidence to indicate that an original optical instrument has been developed and should such lens designs be required they could be developed in Canada. Therefore it appears to be unnecessary to establish Canadian control of the design.

W.W. Gorforth
(W.W. Gorforth) Colonel,
for Lieutenant-General,
Chief of the General Staff .
