ELECTRIFICATION OF T. AND N.O. BEING SERIOUSLY CONSIDERED

In an interview recently with George W. Lee, chairman of the T. & N. O. Ry., your correspondent learned that the scheme to electrify the entire T. & N. O. Ry. is again under very serious consideration. Mr. Lee stated that the cost of doing this would approximate nine million dollars, but the expected compensation would make it well worth while. Detailed reports by engineers of the highest standing, he said, offered every inducement to proceed with the big project. Asked as to the probable result of the present consideration of the scheme to electrify the line, Mr. Lee declared such a development was quite probable sooner or later, but that no definite date could be announced yet. Mr. Lee enumerated various advantages of having the line electrified and expressed himself in favor of the scheme. To make the line of more than 100 miles entirely self-sustaining in regard to motive power, thus eliminating the necessity of heavy importation of coal, may be mentioned among the following more important advantages: By using big electric locomotives, train of from 40 to 50 cars could be hauled over the full length of the main line without losing more than just sufficient time to pass other trains travelling in an opposite direction; both passenger and freight service would be made highly efficient, and the cost of maintenance, once the equipment is installed, would be reduced to a minimum. The nation that can pay its millionaires and refuse to pay for education is doomed.

Come for a Glorious Boat Trip

COMMENCE your boat-trip-holiday at Lewiston, where one of our luxuriously-appointed Steamers will connect with your train. Thence across Lake Ontario to Toronto—through the Thousand Islands and the Florida, to the Cities of Montreal and Quebec. Such is the route of the trip from

"Niagara to the Sea"

terminating in the canyon-like scenery of the Saguenay. We approach Cape Eternity, a towering mass of rock that looks down upon us in isolated grandeur, making our craft look like a microscopic organism in some spectral picture. Our steamer traverses a little bay, and we gaze spellbound at Cape Trinity—the lowest of its three elevations graced by a huge statue of the Virgin—which for 20 years has gazed with seeming compassion on the waters below—impervious to the elements, a thank-offering of a devout Catholic. These mightiest of all the promontories that tower above the dark waters of the majestic Saguenay, form a fitting climax to a trip that has no equal for awe-inspiring grandeur and panoramic charm.

Fireproof Shingles

Looking at a roof covered with Asphalt Shingles, you are at once impressed with its likeness to slate. Asphalt Shingles are made of a heavy asphalt saturated felt and the coating of granulated slate gives them the appearance of genuine slate. They are no more expensive than wooden shingles, but, unlike the latter are fire-proof. Ask for prices.
