> Early next month will see construcnenced on the first of be erected along the southern shore of and taken to Victoria. Vancouver Island. From that time untraps will be erected by a number of last year. All, however, have to go terial is to be preserved it has to be stowed away at the close of the fishpart of each firm which contemplates

entering the business. A number of the firms are of the opinion that the beginning of March is a little early to commence the driving of piles, and will wait until later in the season, but others undaunted by ary fear of storms will go ahead 2 o'clock this afternoon.

as stated. At the close of the fishing season last fall it was thought that a number of canneries would be built on the island this year, it being found that the long haulage of the catch of the traps to the Fraser canneries involved big expenditure, and that a great advantage lay in canning the fish on or near to the spot where they were caught. The Capital City Canning & Packing Company, which is a company of Victorians, still adhere to this belief, and will build, it is understood, in Esquimalt, but other firms, according to a well known cannery man, are direction this year for the reason that | under fire will receive bronze medals. they believe the speculation to be too great to be undertaken during the present year. They are influenced by the fact that for the next three seasons off-years are looked for in the salmon business, and the risk of going IT to a large expense on the prospect of receiving a catch that would compensate them for all is something they do not wish to take.

Conditions, however, are different in the north, and the coming season will witness four new canneries in business. There are at the present time The Todd cannery was built last year, Vancouver firm. This cannery will be three weeks I was cured."

situated on the Skeena. Horne, his son, R. Van Horne, and J.

[Continued From Page 8.]

passengers. The oars were out and they were pulling together. The captain gave the orders for the boatswain to leave the ship. He was to go, try and make a landing and get upon the cliff and take a line. After that everybody was on the lookout to see whether the boat's crew had succeeded in their mission. It was about two hours after the departure that the Lyall gun had been fired and a line sent above the bluff. Immediately after an attempt was made to clear the line of the wreckage. An hour or so after it broke and the end fell into the hands of the man who was imprisoned in a cave in the cliff. He tried to climb from his dangerous position by its means, but was unsuccessful.

As quartermaster his duty did not include the examination of charts. While steering an officer was always on the bridge. Quartermaster Clawson was the man at the wheel when the ship struck. Counsel then asked what experience he had in that position.

such questions. He did not think the experience of Quartermaster Clawson was at all relevant. Mr. McPhillips differed from this view. In his opinion it was most important to know the qualifications of

the man at the wheel at the time of the accident. The matter was passed over, and counsel concluded with a remark about the distribution of the crew among the ship's boats. Witness said he read the card on Saturday afternoon. To J. H. Lawson, jr., counsel for the

Duty of Every Member

of the crew to read the instructions upon entering the vessel. He didn't know when fire drill would be held, and without a knowledge of his position might be "wandering about like a lost ship" on such an occasion. Chas. Brown, an ordinary seaman, stated that he joined the Valencia

shortly before she left San Francisco. He had nothing to do with the ship's navigation. On Monday night he went below at about 8 o'clock. There was a heavy sea running, and the weather was thick. He assisted in taking the soundings. He had no means of reading the register or determining the nature of the bottom. The first sounding ne knew that 250 fathoms was returned.

Invited to give his story of the disaster, witness told of striking and to No. 3 to assist in launching it. He

form a crew to go ashore, and he accepted the invitation. They got away successfully, and he believed that the at all times be exported." captain himself let go the painter.
