At The Eleventh Hour.

(By Beatrice Sturges.)

Everything in the room betokened confusion and busy preparation for some event of considerable importance. A pile of notes just finished lay on the desk, two trunks, one already strapped and the other standing open, indicated a journey; several frocks occupied the bed, piles of lingeria filed the chairs, various other feminine belongings were scattered about and a maid was hastly transferring them to the open trunk and the new handbag which stood on a table. Now and agair she addressed some question to the girl who still sat at the desk and who answered in monosyllables with a preoccupied air. "Oh, put in or leave out whatever you like, Marie; it doesn't make a bit of difference!" she exclaimed at last, impatiently.

Marie, won iering, within, obeyed, but presently she came forward with something which she begged mademoiselle to try on.

"Truly, it must be seen if it is what you cell at true; at the more of the proposed and the receiver."

"While her lips still pressed the pic ture, a sharp ring startled her.

"You answer it, Marie; it's probably tomotrow; tell them Mrs. Rutherford as is out and to call up in the morning."

The surprised maid, knowing well that Mrs. Rutherford was in, stepped out into the hall to answer the telephone. In a moment she returned.

"It was for you, mademoiselle; a gentileman who insisted; so I have turn ze switch."

Licy sat down again at the desk and took up the receiver.

"Yee, this is Miss Rutherford."

The voice at the other end of the wire was strangely familiar. It made her eyes shine. She almost dropped in the creeks burn, her heart throb and the receiver.

"Why, Ralph!" she exclaimed.

moiselle to try on.

"Truly, it must be seen if it is what you call all right," she protested, and the girl rose and walked to the mirror. She was wearing a long, loose gown of yellow silk and her nut-brown hair was caught up loosely on her head. Marie stepped in front of her for a moment, did a little adjusting and matting thise way and that, and then the stepped in the stepped in front of her for a moment, did a little adjusting and matting thise way and that, and then the stepped in front of her for a call."

The girl looked into the glass as if in a dream and then her heart throbbed painfully. She had put off the full realization of what she was about to do and had lived in a vague hope that something would happen to stop it, but now as she looked in the ding veil, the bitter truth came home. This bridal symbol, so sweet and lovely in itself, became suddenly hateful to her, for in all its frailty it brought to her the stern realization that the next day at noon, in St. Johns' church, she, Lucy Rutherford, was to be married to a man she did not love.

How different, oh, how different it might have been!

She tore off the veil and threw herself on the bed in a passion of tears.

You didn't say what your answer to the note was?"

"Really? And you did think of me while you were gone? And you still care?"

"I should think my note told you that. Of course I do. I never stopped."

"Oh," faintly, "you heard just now about tomorrow? Well, I'm not, I'm not. I made up my mind ten minutes before you called up, and when the bell rang I was—I'll tell you when I see you."

ence what her stepmother said or did or threatened—she could marry him herself, but as for Lucy she simply hated Hugh Goring all at once and she never wanted to see him again!

She sat up presently and bathed her eyes in the water the discreet Marie brought to her, and felt better. Then as the maid turned again to her packing Lucy thought miserably of a certain night six months ago when she had quarrelled so bitterly with Ralph Anderson and he had left her presence, without one backwark look and a very vicious slam of the door. She looked around the room and then the had where Marie had stowed everything necessary. From the window she saw a large carriage slowly approaching.

MEDICINE HAT'S

MONEY MAKER

MEDICINE HAT, Sask., Aug. 18. MEDICINE HAT. Sask., Aug. 18.—
Medicine Hat is perhaps the only city in the world that keeps its lamps alight day and night, month after month and year after year. This is the way Mayor Foster explained it to me:—"We have 56 lamps in the streets of Medicine Hat, and they cost us four cents each per day, burning them all the time. If we undertook to save half that amount by hiring a man to turn them out and relight them we should them out and relight them we should certainly lose on the transaction. We should save \$7.84 a week and we could not get a man to work for that in this country.' And so the lights burn merrily away. It looks somewhat extravagant, and perhaps the remote descendants of the dants of the present citizens of Medi-cine Hat will reap bitter reproaches on the memories the memories of the ancestors who kept their taxes down to fourteen mills on the dollar by burning gas in the daytime. But Mr. Eugene Foss, the eminent American engineer, declared only the only day after a careful investigation of the gas and soils and general situation that there is no reason why the natural gas of Medicine Hat should not last a century, or, for that matter, for several centuries; and who troubles himself today about the possible re-proaches of posterity in the year 2000 or 2100? Besides, they may have lost

all use for gas by that time.

It is not only by lowered taxation that the Medicine Hatters—if they may cost last year \$61.15. The averaged sixcomed house can be lighted and heated the year around for \$3.50 per month. Coal is at a discount. It does not pay for the mining around Medicine Hat, although there is plenty of it here. It is the same with the factories. The woollen mill, with 65 horsepower, pays only 85 cents a day for power and heat. The Assimbola Hotel, a building of 85 rooms, paid last month but \$49.30 for 20 lights, furnace and cooking for 20 lights, furnace and cooking range. The local planing mill, with 22 horse power, gets its motive power for twelve cents a day. The actual cost is five cents for each thousand cubic feet, and 26,000 cubic feet, costing \$1.30, produce results about equal to those obtained from one ton of Pennsylvania coal. It is no wonder that Medicine Hat feels that it has something exceptional to offer manufacture. thing exceptional to offer manufactur ers in the way of advantages. The sole point of doubt lies in the question of permanence, concerning which no more can be done than to quote opinions such as that of Mr. Foss, and to point
