He had a big enough brain to see the advantage of welding them together, and to this work he set himself. He joined the strongest union, as a beginning, and at once began to fight for supremacy. His shrewdness, his magnetism, his fists were used in turn, and well they served the adventurer. Rival after rival he met and despatched with one of his weapons or another. The gold mine lay open at his feet. He was not slow to help himself. His methods of extortion were crudity itself.
